No. I.

India Office to Foreign Office,-(Received March 8.)

THE Under-Secretary of State for India presents his compliments to the Under-Secretary of State for Foreign Affairs, and, by direction of Mr. Secretary Morley, forwards herewith, for the information of the Secretary of State, copy of inclosure in a letter from the Foreign Secretary to the Government of India, dated the 1st ultimo, relative to an offer of the German Consul at Bagdad to subsidize the Carmelite schools in Turkish Arabia.

India Office, Murch 5, 1908,

Inclosure in No. 1.

Extenct from the Diary of the Turkish-Arabia Political Residency for the Week ending January 1, 1906.

December 26.—I learn on good authority that the German Consul here has offered to subsidize liberally the Carmelite schools in this country if they will undertake to teach German. He said that as the Bagdad Railway was near at hand it was important that the German language should be diffused in these parts.

This intelligence appears to me to be important as showing the intention to spread German influence through this country.

(Sent to Embassy, Constantinople.)

Constantinople, March 5, 1906.

WITH reference to my despatch No. 61 of the 3rd ultimo, I have the honour to forward herewith a despatch from His Majesty's Agent and Consul-General at Bagdad, reporting on German activity in Memopotamia.

I have, &c. sd. N. R. O'CONOR. (Signed)

#### Inclosure in No. 2.

## Consul-General Newmarch to Sir N. O Conor.

(No. 168/13.)

Baseled, February 5, 1906.

IN continuation of my despatch, dated the 2nd February, 1906, I have the bonour to submit, for your Excellency's information, the following further extract from my diary to the Government of India of to-day's date :-

"I hear that the new German Consul at Mosul is Herr André, who was fur some time employed on the excavations at Babylon.

He is clever and capable.

"I also hear that several German topographical parties have begun surveying in Northern Mesopotamia, but in this respect my information is at present indefinite.

I have, du. L. S. NEWMARCH. (Signed)

[10397]

No. 3.

Sir N. O'Conor to Sir Edward Grey .- (Received March 26.)

(No. 184. Secret and Confidential.)

Constantinople, March 20, 1906.

IN my despatch No. 503 of the 16th August last I reported that the German Syndroute, formed under the auspices of the Deutsche Bank to obtain a Concession for the working of the potroleum fields in Mesopotamie, was on the point of renewing the Provisional Agreement with the Civil List for another year, and that the Agreement conferred on it the same advantages and privileges as a "permis de recherches." I have since learnt, however, that what the Germans roally obtained was an option for the Concession on equal terms with those offered by any other group that might come forward.

Quite recently, the Palace being in want of an advance of £ T. 50,000, the Civil List was instructed to invite the German Syndicate to take up the option at the price of the above aum, but the Germans, convinced that their position was absolutely secure, and that they could afford to defer taking any action until their railway schemes were further advanced, and having also, so I am informed, some difficulty in finding the money, were unwilling to give more than £ T. 25,000, and the proposal of the Civil List was formully espected by M. Hugusmin on behalf of the Syndicate. The Germans having thus declined to exercise their preference rights, the Civil List was instructed by Imperial Irade to offer the Concession on similar terms to any other group of repute, and commenced negotiations with Mesers. Gilchrist and Walker, an English firm of this city, who have been carefully watching the question in the interests of Mr. D'Arcy and his friends, who hastened to take advantage of the opportunity thus offered. They have accordingly been treating with the Civil List for the transfer of the option for a period of three months to a M. Eichsterff, a Dutch lawyer, acting in their name, and the negotiations have reached a point which appears to promise immediate success. The matter stands as follows: The Civil List state that, to enable them to submit the proposed transfer of the option to M. Richstorff for the Imperial sunction, they must be turnished with a written declaration from a bank of standing that that gentleman is in a position to pay the £ T. 50,000 on the signature of the contract of concession, and 44, in order to prevent the negotiations coming to the knowledge of the Germans, they have requested that the uniter may not be mentioned to the Imperial Ottoman Bank or Credit Lyonnais, Mesera Gilchrist and Walker have, with the approval of the Civil List, applied to the Banque Nationale of Athens. Messra Gilchrist and Walker have no doubt as to the readiness of this bank to give the required declaration, but they have not been able to obtain it owing to the absence from Constantinople of M. Caloraressa, the local Director. They expect him to return in a day or two, and are confident that they will then immediately secure the option for the Concession

The Concession is to cover not only Mesopotamia but the whole of the Vilayets of Bagdad and Masul, and the £T. 50,000 is not to be paid over until after the signature of the contract of concession between the Civil List and a Company to be formed within three months, for which the option holds; it is, moreover, to be regarded as a losa to be paid back gradually out of the royalties on the raw oil extracted.

Messrs. Gilchrist and Walker have secured powerful support at the Palace, and they are convinced that when once they are in possession of the option, the eventual

Concession is assured to them.

I need not dwell on the advantages which must result to us from the acquisition by a British capitalist of a Concession covering the two provinces of Mosul and Bagdad, nor on the commanding position we should acquire thereby in relation to the questions connected with the Bagdad Railway. I venture, however, to suggest that Mr. D'Arcy might be informed confidentially of the situation as it now stands, in case there should be any difficulty or delay in Messrs. Gilchrist and Walker obtaining the declaration required by the Civil List. Mr. D'Arcy is already, I believe, aware that negotiations are in progress with the Civil List, but I am given to understand that for various reasons Messrs. Gilchrist and Walker are unwilling to approach him with any request for financial support in this motter until they have actually obtained possession of the option and are in a position to offer it to him.

N. R. O'CONOR.

[10399]

No. 4.

Sir N. O'Conor to Sir Edward Grey. (Received Murch 20.)

(No. 186.) Constantinople, March 20, 1906. WITH reference to my despatch No. 643 of the 19th September, 1905, I have the honour to transmit herewith copy of a despatch from His Majesty's Consul at Hussorah inclosing copies of letters which he has received from the local agent of Messes. Lynch Brothers, and from Captain Denne, of the Turkish stemmer "Hamidich," with reference to the competition between the Euphrates and Tigris

Steam Navigation Company and the Hamidieh Steam-ship Company.

Mr. Crow offers some interesting remarks on this correspondence, but I think it is also worth noting that the letter of Messrs, Lynch's agent clearly recognizes that there is ample and remunerative work for both Companies on the Tigris; and the fact that his Company have not thought it necessary to lower their cargo rates to the charges made by the Bamidich Administration may be taken as a sure proof that Messes. Lynch's steamers have quite as much of the carrying trade as they can conveniently handle, and that the competition of the Turkish steam-boats is not sufficiently severe to affect their profits.

I have, &c. N. R. O'CONOR.

#### Inclosure 1 in No. 4.

Coursel Cross to Ser N. O'Conor.

(No. 9.)

Busiorah, February 22, 1900. I HAVE the honour to transmit herewith, inclosed to your Excellency, copies of letters received from Mesons, Lynch Brothers, and Captain Denne, of the Turkish steamer "Hamidish," with reference to the competition between the two Tigris River

Transport on the river is less congested than formerly. Messrs. Lynch Brothers state that there is less cargo to carry, while, from Captain Denne's letter, it would appear that the Turkish line secures the bulk of the direct cargo from home and

Lynch's Company that forwarded in transit via Bombay.

The "Hamidich's" engines have lately broken down, and the vessel is laid up temporarily. I am informed that the Turks are at a loss how to repair them, as the English engineers have left. I have no further information regarding the purchase by the Turks of vessels in Belgium, beyond the statements in the inclosed letters. Mesars. Lynch Brothers suffer considerable annoyance from the arbitrary proceedings of the Hamidieh Administration's servants in river matters. I have brought instances of the had behaviour of the latter to the Vali's notice, and have asked him to caution the Manager. I am, however, as yet unable to say whether my representations have had the desired effect. I think-at present, at all events-that Mesars. Lynch Brothers are more likely to suffer from the bad handling of the Turkish vessels than

from the effects of any genuine competition in the carrying trade of the river; but the "Hamidieh" undoubtedly takes a large proportion of the through cargo to Bagdad.

I have, &c. (Signed) F. E. CROW.

Inclosure 2 in No. 4.

Mr. S. Dods to Consul Crow.

(Private and Confidential.) Euphrates and Tigris Steam Newigation Company, Dear Mr. Crow, Bussorah, February 16, 1906.

WITH regard to your request for confidential information about the Hamidich Steam-boat Administration.

The competition experienced by our Company during 1905 has been very keen, especially for the native passenger traffic.

The increase of their fleet by the steamers "Hamidich" and "Burhanich" should have enabled them to deal with double the amount of cargo they were formerly able to carry. However, the expectations about the performance of these atcamers has not been fulfilled. They are faulty in design, and inferior material has been used in their construction, consequently they are frequently breaking down.

Both these atomers have been dispatched from Busaomh either a day or a few hours, as occasion demanded, ahead of our steamers in order to attract the native powersers.

Cargo rates have been reduced by them to 2s. tid. lower than our Company's. Our figures for through cargo (i.e., booked in Europe) from Bussessh to Bagdad are at present 32s. 6d. per ton for general cargo, and 30s. per ton for sugar.

It is reported that the Hamidiel Steam boat Administration have purchased two new steamers from Mesers. Cookerill and Co., of Belgium, and we presume the Turks will take due care that the faults which have come to light in the "Hamidiels" and "Burhaniels" will not be again repeated.

When these steamers commence running, the competition will no doubt be even

keener than it now is.

May I draw your attention to the following incidents, which only too plainly illustrate the risks encountered by our steamers when meeting the Turkish steamers white under weigh

While lying at anchor at Bussorah on the night of the 29th April last, our steam launches "ishtar" and "Asp" were damaged to the extent of over 2001, and our steamer "Blosso Lynch" at the same time was nearly run down by the Hamidich Steam-boat Administration Company's steamer "Ressain."

On the 29th December their steamer "Mosoul" ran into and sank the barge of the "Bagdad" while they were stopped alongside the bank near Khalet-Saleh.

Since the "Ressafah" collided with the "Khalifah" in December 1902, our steamers step and keep as near the bank as possible when they meet the Turkish steamers.

In connection with the damage austained by our launches, Lloyd's agents were requested by the underwriters to prosecute the Hamildich Steam-bost Administration, but they replied and informed the underwriters that to do so would only be throwing money away. The "Hamildich" and "Burhanich" are officered by natives (with the exception of one European) who have no professional training, and with two more powerful Turkish steamers on the river, also being run by incompetent officers, the risk of accident by collision to our steamers will be greater than before,

I would also beg to remind you that it is now four years our Company has been defending the "Khalifah". Reseafah "case, where a sum of £T. 16,750 is claimed. The fact that the Turkish Government are the presecutors debars our Company from obtaining justice, and the poor consolation we have to necept is that we can appeal against the inevitable adverse verdict and carry the case to Comstantinople, which will entail additional heavy expenses.

If the object of the Turks is to demonstrate the impossibility of our Company obtaining redress for accidents caused by those in command of their steamers they have every reason to be astisfied with their faction.

Yours very truly, (Signed) SAML DODDS. Inclosure 3 in No. 4.

Captor Denne to Coural Crow. ....

Deer Mr. Crow, "Hamidick," at Busserak, February 2, 1900.
I AM sorry, I had so much to do during my stay here last voyage, that your note

I do not know that there is much to say about our steamers. There are always two sent from Bussorah to Bagdad every week, and they seem to be paying

I think we have the larger proportion of earge from home. The transhipment cargo via Bombay B. I think, mostly handled by Lynch's boats. We get most of the dock passengers, and Lynch, partly owing to their arrangement with the British India, carry nearly all the European passengers.

Two more boats are to be built in Belgium, I believe, but I cannot say when they

are to be delivered. Probably at the end of this year.

There is very great need on this river of a Conservancy Department for the removal of wreeks, &c., and a few lights would not do any harm; but I do not suppose the amount of British shipping at present up here would justify you in raising the question if you felt disposed to.

There seems an idea amongst the unthinking part of the population that I am bribed by Lynch to run my steamer detrimental to the interests of the Senea. It is, of course, ridiculous; and as a matter of fact the "Hamidich" runs much more regularly and with less accidents, &c., than the "Burhanich," which is commanded by a Turkish marine officer.

Lynch's steamers have run like clocks during the last year, and I much fear that our two new steamers, although they are perhaps faster, cannot become such a well-conducted concern as Lynch Company.

The deck passengers travel by our steamers principally on account of the fure being generally less.

There was an accident the other day which resulted in the sinking of one of our cargo barges. The cargo was salved, but the barge is a total wreck.

I do not think there is anything more to say, and this is very little.

Yours truly, (Signed) G. H. A. DENNE.

No. 5.

Sir N. O'Conor to Sir Edward Grey,-(Received March 26.)

(No. 197.)

Constantinople, March 20, 1906.

I HAVE the honour to transmit herewith copy of a Memorandum by Mr. Mark
Sykes, Honorary Attaché to His Majesty's Embassy, on certain aspects of the Bagdad
Railway.

It is an interesting study on the chances of the appropriation of the surplus revenues of the Public Debt or other State resources of the Ottoman Empire to a kilometric guarantee of the railway in question.

The information, as embodied in this Memorandum, has been obtained from

reliable sources, and is accurate up to the date of its completion.

The competition between the Ottoman Bank, which is supported by the pressing needs of the Imperial Treasury and the Bagdad Railway Company, diminishes the probability of this surplus being obtained by the latter.

In fact, I understand that the surplus of 1990 is already partly hypothecated to the bank, and that the latter are in negotiation for further loans, to be secured on the surplus of 1907-1908.

I have, &c, (Signed) N. R. O'CONOR.

[1687]

C

## Inclosure in No. 5.

## Memorandum by Mr. Sykes respecting the Rugdad Railway.

IT is now nearly two years since the first section of the Bagdad Railway was completed, and rumours have long been abroad to the effect that the immediately casuing sections will presently be undertaken. The following figures may assist in forming a judgment as to whether this is possible or no without British co-operation:—

Before going further, it would be as wall to inquire into the working of the system of kilometric guarantees on State-supported lines in the Ottoman Empire.

The scheme is briefly as follows:

A Company undertakes to construct a line of a certain length, and the Ottoman Government guarantees that the Company's annual receipts shall reach a certain specified sum per kilometre—that is to say, if a Company build a line 20 kilom, in length and the Government guarantees 1,000 fr. per kilometre, and in a given year the Company's actual receipts amount to 500 fr. per kilometre or 10,000 fr. on the whole line, the Government is obliged to provide 10,000 fr. to make up the deficiency

between the sum guaranteed and the Company's receipts.

To the payment of the guarantee the Government ear-marks certain revenues for the purpose, which are then collected by the Administration of the Public Debt; but it is as well to make it clear that these ear-marked revenues are never equal in value to the whole guarantee, as the fact that the railway will have at least some receipts is naturally taken for granted, though, speaking generally, the ear-marked revenues usually exceed the acticipated deficit in the Company's receipts by a considerable sum.

Whatever be the difference between the deficit in receipts and the yield of the car-marked revenues is handed over to the Ottoman Government; such money is termed a surplus, and will be referred to as such in this Memorandum. The surpluses

on the various railways are liable to fluctuations from two causes :--

1. Amount of receipts on the railways.

2. Amount yielded by the enr-marked revenues.

The amounts of the kilometric guarantees naturally vary on the different lines, as do the proportionate values of the car-marked revenues assigned to make them good. This has led, on occasions, to considerable surpluses on some lines and actual delicits in guarantees on others. However, as the total surpluses completely outbalance the total delicits, the whole of the guaranteed railways in the Ottoman Benpire came to an understanding by which it was agreed that any deficit on any one line should be made good out of the total surplus of the remainder; this agreement has the tacit coment of the Government, and the present arrangement is that the Debt pools the waste of the car-marked revenues and pays each Company the sum required to make up the deficit between its receipts and its guarantee.

The everage total surplus of the various car-marked revenues over the total deficits on the railways of Turkey, including the surplus on the Osmanich and Fisheries Loans, stands at £ T. 229,737 for 1900, 1901, 1902, 1903, 1904. This surplus, in spite of occasional bad years, is increasing, partly owing to the general increase of receipts by Railway Companion and partly owing to the increase of the value of the ear-marked revenues. In the year 1904 the surplus was £ T. 340,000,

and in 1905 £ T. 316,000.

It now remains to consider the financial arrangements laid down by the Bagdad Convention for the construction of the sections of the Bagdad Hailway. It was negreed that for each section a loan should be made on securities given by the Ottoman Government, that this capital should defray the cost of construction of the section, and that when the section was in working order the Turkish Government would give

a kilometric guarantes to cover working expenses.

By section 35 of the Bagdad Railway Convention it was agreed that the working expenses kilometric guarantee on the first (or Konia Eregli) section should be met by the surplus on the Anatolian Railways. As this surplus is about £ T. 49,000, and the sum required to make up the guarantee is about £ T. 26,000, there is still a balance of £ T. 23,000 to pool in the general milway surplus of the Empire. The German financiers undoubtedly wish to construct the ensuing sections of the Bagdad Railway, but the next section to be completed presents the greatest difficulties from

a financial point of view, owing to the magnitude of the engineering works necessary

for the passage of the Taurus Mountains.

It is said down in the Bagdad Railway Convention that a loan not exceeding 54,000,000 fr. may be raised to defray the cost of construction of any one section. The next section it is estimated will cost about £ T. 4,000,000. A nominal loan of 54,000,000 fr. issued at the same price as that for the first section will only realize £ T. 2,052,364, or little more than half the same required. The Germans propose, therefore, to build three sections at once of 200 kilom, each, and as it is estimated the following two sections will only cost £ T. 700,000 apiece, the total cost of the three sections would be £ T. 5,400,000, and the loan to meet the expenditure would produce £ T. 6,150,000, leaving a considerable margin of safety to meet unforeseen difficulties.

The service of this loan would require the assignment of revenues to the extent of £ T. 320,760 per annum. If we take the busis of the Konia-Rregii section the annual sum required to be car-marked to meet the working expenses-kilometric guarantee would be £ T. 76,000 per annum. The question is therefore whether the Ottoman Government has the revenues at its disposal to produce £ T. 396,760 per annum to meet interest on the loan for construction and to make up the working

expenses-kilometric guarantee on three sections.

The Debt has at present a surplus from tithes of roughly £ T. 800,000, and from the coded revenues an approximate surplus of £ T. 800,000 more, making in all a surplus of about £ T. 800,000. A short time ago a contract was aigned for a loan on the surplus of the coded revenues, amounting to 3,500,000£, but owing to some hitch in the negotiations the Ottoman Bank only advanced 1,100,000ℓ. The interest on this advance amounts to a charge of £ T. 56,917 on the surplus revenues of the Debt, leaving a net surplus on the coded revenues of about £ T. 240,000 and £ T. 300,000 surplus on the tithes, making in all a total of £ T. 340,000. For the present year the whole of this surplus has been allocated by the Imperial Ottoman Covernment for various purposes in their current Badget, but as this is only as set of annual expenditure it in no way makes this surplus unavailable for the purpose of securing a future loan.

The Germans have in hand the sum of at least £ T. 400,000, which was cleared over the construction of the Konia-Eregli section of the Bagdad Railway. This money is at the disposal of those financiers and politicians to whose interest it is to see that the Bagdad Railway is built, and competent judges are of opinion that this sum is sufficiently large to coable them to persuade those in power to assign the remaining surplus of the Public Debt for the purpose of paying for the service of the construction loan, and securing the working expenses-kilometric guarantee of the

next three sections.

It may be held that this surplus is liable to fluctuations, and is therefore not good as a security, but a glauce at the figures of the Public Debt will show that its only tendency is to increase, for, in spite of political troubles, bad harvests, and inefficient Covernment, there is a steady rise in the receipts of the railways, which brings with it a corresponding decrease in the sums required to make good the kilometric guarantees, while the tithes assigned to cover the guarantees in question continue to increase in yield and value. Besides these causes of increase in the surplus there is another, in that the annual revenue derived from salt, spirits, stamps, flahories, and silks has nearly doubled itself in twenty-three years, not by sharp rises, but by a steady and general rise in every item of the revenue. These facts tend to show that the increasing surplus of £ T. 540,000 is a reliable security for the £ T. 390,760 required, for it must be remembered that the £ T. 76,000 hypothecated for the working expenses-kilometric guarantee of the three sections represents a gradualty decreasing sum. The Konia-Eregli section, which we took as a basis of calculation, is at present an extremely unfavourable figure. When it is linked to the sea the traffic receipts of the section must almost certainly be doubled, and not only will money be thus released to pay for the working expenses of the two following sections, but they in their turn will begin to contribute considerable receipts to their own support; though, indeed, it would be rash to make any prophecy as to the fourth section, which for the first two years may have but little to do.

Before going further it would be well to consider another argument that has been used to depreciate the value of the revenues hypothecated by the Ottoman Government as security for loans and guarantees, and is based on the fact that the Turkish Government is suspected as being on the verge of internal bankruptcy. It is said, and with

justice, that current expenses can only be not by loans, and that various shifts have to be resorted to to meet the daily wants of the public service

This no doubt is as true to-day as it was vesterday. The difficulties of the Turkish Government are perhaps increasing, but it must be borne in mind that a deficit in the salaries of the officials, a lack of money for military or public works, or a considerable fluminal cavity at head-quarters does not bring about a corresponding depression in the revenues assigned to the Debt, which depend for their yield, not on

in the day of distress, but on the industry of the peasonts, the richness of the soil, and the method of collection, three factors which are not influenced by the financial straits of the bureaucracy; in fact, the Government's difficulties arise from an increasing expenditure, and not from a decrease in the potential wealth of the country. Once a revenue comes into the bands of the Public Debt, for the purpose of accuring a loan or making up a guarantee, there is no doubt as to its disposal, univ the antiplus

the investment of capital in Turkish leans cannot be denied, but it may be that they are not as formidable as they appear. The first danger is a war with Bulgaria, which, so long as it lasted, might swallow up all the hypothecated revenues; but on the other hand it is larely possible that such a war could last above six months without coming to a decisive more one way or another, and the Beht has guarded against such a contingency by the establishment of a sinking fund, which at present would cover a full year's deficit. The second danger which bouldablem have to face is a general internal fluxuousl crash, resulting from an absolute lack of ready money at the Treasury with which to idence the chanours of the unpaid officials, both military and over. It is just possible that it such a crish a desporat, more might be made to seem the our marked incremes assigned to the Debt; but in so his case the Great Powers could not permit such an event to take place, their combined interests would be too great to allow any

of a general financial control would became a matter of necessity, and such a control would certainly guarantee the interests of the bondholders. It will be readily under i, therefore why it is that German fluanciers are prepared to face these rules, anone

. Red be, considering that circumstances maire them against actual danger

There is, however, one point to be considered as regards the possibility of the Gormana being given the net surplus of the Debt as a security, and that is that there are other financiers in the field who desire to obtain that surplus from the Ottoma Government. It has been shown that the gross surplus of the Bobt has already been n loan of 1,100,000f, which has been to 1,100,000f advanced. It is now atong the increase of this for the second s put t W F x F x F T T 10 . . . 1 1 1 1 No are a big to a second to the second second second tex y 

There is one other point on which it may be well to touch before closing this Memorandum, and that is, the alternative scheme of which the Germans may avail themselves supposing the financial and origineering difficulties of the Taurus prove too acrious on impediment to their plans. By the Bagdad Railway Convention it is agreed that the Bagdad-litissurah section shall not be exploited until the whole of the trunk line is completed. This clause does not proclude the building and working of other sections, and now that the Germans have control of the Mersina-Adams have there is nothing to prevent them from building and exploiting the whole

of the line between Adams and Bugdad in which case Adams could be linked with Bregli when sufficient money had been laid aside from loans and profits on construction of the Bagdad Adams sections to overcome the difficulties of the mountain range.

Mr. Spring-Rice to Sir Edward Grey - (Received April 2)

( o. 215. Confidential)

St. Petersburgh, March 28, 1906.

I BEG to thank you for the communication of the Memorandum of the Director of Military Operations, dated the 22nd February, relative to the new Russian read from Kaxem to Humadan

- ure to submit the felaswing observations -

to Kermandah, which lapsed owing to the Russian Legition, which lapsed owing to the Russian Legition, which, I belie to the remove consequences of the read were constructed and worked by the

dd the Amstehan hae be continued to Bagdad, and a branch line constructed to the Person frontier at Khandon, and the former termin Concession for the Kerman-hab line be reviewd, the Germans would central the pilgram route to Kerbelah which is the only line in Person which is cortain to pay. The traffic on it would be considerable and core and

with strong letters of recommendation from the Sulma to the Shall, has been connected for some time with the Deutsche Bank and the Haghal Hadway, on which subject he is considered a specialist. It is not unreasonable to suppose that his mission may be

not unconnected with a project for linking up the Bagond Railway with Persia by means of a road via Khanikin. Such a scheme will nearly affect Russian interests in Pera at william to the state of extends to Julia, on the Araxes, and a road to constructed to Tabroez which can be readily converted into a railway. From Tabreez to Hamadan via Kazvin, as is pointed out in the Memorandum of the 22nd February, the construction of a railway may be

to be in preparation. The line to Tabreez should be a paying undertaking, as the province tapped is one of considerable fertility. The continuation to Hamadan would not apparently be profitable. But from Hamadan to Bogdad (should a line be con-

structed) the pilgrim traffic insures the profitable nature of the undertaking

Ciproni are completed, which would be the work of years), the Russian route via Persia would seem, from the commercial point of view, a more promising undersaking, and one which should prove more attractive to capitalists. Thus, in the race to Bagdad, Russian caterprise might have a reasonable chance of winning, if supported by the necessary capital. The obstacles are mainly political—a.e., the objections of England in Person and of Germany in Turkey Should these objections be overcome, Russia would command a direct route to the south via Peron and Bagdad. If, at the same time, kogland were intrusted with the construction of a line from Koweit to Bagdarl, the interests of Germany, England, and Russia would all have due consideration. If there were objections to the division of the line into apheres of interests, the whole radway system, with the runtheattons, could be internationalized, and worked in the common interests of the world

Ine French Anthussador informs me that some in plan would be viewed not to the construction of the Bagdad Balway it will event thy be a structed by Corming alone. Rossia, howeve has objected, and without the consent of Rossia the participal in of branco and and would be morely playing into Germany's hands, and quite needlessly als ating Russia for the benefit of Germany But if Russia could be induced to withdraw her opposition, France would gladly enter into the Garman scheme. I have since understood, though not with positive certainty, that Count Witte is not arone to the countriction of the Bagdad Radway on the understanding that Russia receives the right of joining up har own system with the projected line. I renture to point out that if a line were constructed from the Gulf to Bagulad, England would also receive certain commercial facilities which would be of great value. It might thus he possible to recurede the conflicting interests by a general schome which would do justice to the clottes of all parties concurred. But it is evident that if Gormany obtains the concession to Kermanshah and Hamadaa the combination above outhord becomes impossible, and that it might, therefore, he as well that the Governments of England and Rusins should interchange views as to the course to be taken in view of such an eventuality.

In conversation with M Bartwig, I have touched lightly on these considerations. has expressed humself strongly on the subject of a possible German Railway Concession in Persia, and told me that he did not believe that his Government could be brought to consent to it.

[12336]

5 , 15,

Sir Edward Grey to Sir Fronzia Bertie

Foreign Office, April 6, 1908 I TOLD M Cambon to-day that I had lately been studying the question of the

Bagelad Radway, with a view to seeing what had taken place before I came into office, and what the present present present was

It weemed to me possible that the railway would be made in the end, anyhow, and if no it would not be desirable for us, or for France, or for Russin to oppose it, but eather that we should all consider on what forms we should be prepared to partie, dec. it. I told M Cambon that I spoke to him first because we should not like to do mything in the matter without France, and because the difficulty in our way was the opposition of Hussia. M Sexumow had lately spoken to me in already opposition to the Bagdad It way, on the ground of congnerous competition with the grain-growing provinces Very probably he had political reasons also for his opposition, but he did bens. I did not wish our Government at this manual to embark on any enterorms in those regions, or to take any action which would be regarded as unfriendly to

feel, and at had the efore occurred to me that if the French Government felt the time had come to recover the question they might with to ask the Russian Government whether it would not be tester for them to consider on what terms they could join, rather than continue to offer opposition which would not, in the long run, prevent the railway from being made.

I suggested that the Russians might make a one which would join the Ragitad Radway eventually at such a place as Khamkin, and through it they might share in ti-

joint commercial mitlet at Koweit, or wherever else it in glit be-

V a about old me that the Russians had already an armagement by which the Sultan had pounted them a refusal of any radways to be made in the northern provinces of Asia Minor which bordered on Russian territory, and by which they would tave the central of any branch lines from those provinces to the Bagdad Railway Placedore he was desposed to think that Russia need not continue to offer opposition to the making of the Bagdad Railway

I said I had no knowledge of what view the Gormans would take of the question, and M. Cambon said he had done either. But I told him that I had widned to mention the question to him now, because it might be that negatiations would be reoponed, and before that happened I wished the Russian Government to be propared

to recounder the question,

I HAVE the honous to reply to the Embassy desputch of the 3rd February, 1996,

regarding the new German Vice-Consulate at Mosul.

2. Prior to the receipt of this letter I have already given your Excellency all the information I have on the subject, and it only remains to observe that, in my opinion, the exercations at Bubylon and Kela Shergat, though mainly, are not merely excavations for archimlogical rescorch. It seems hardly necessary to have at Habylon three highly-trained surveyors, who appear to have a good deal of engineering knowledge as well. Moreover, the excavations advance so slowly that one is inclined to think there must be some reason for the leasurely progress that is being made and to wonder what is being awaited. The employee at Babyion are changed rather frequently, apparently as soon as they have mastered enough Arabic and acquired enough patience to control and direct Amb labourers. Such men will be very useful hereafter when the Bagdad Railway enters this part of the country, not only in managing, but in collecting, numbers of Arab workmen

3. I am not so familiar with the work and procedure at Kola Shergat as with that at Babylon, but from such knowledge as I have, I think ansilar remarks would

apply to Kola Shergat also.

1. I think both these places are meant not only to serve the suds of archivology, but to set as centres for the collection of information and the dissemination of German influence. I cannot be certain that this is so, but your Excellency receives information from so many sources that you may be in a position to confirm or modify the opinion I have indicated

L. B. NEWMARCH (8)gned)

#### soluture 2 in No. 11.

# Consul General Neumarch to Sir N O'Conor.

(No. 81.)

Randad, March 10, 1906

IN ruply to your Excellency's despatch of the 3rd February, 1906, regarding the German excurations at Kela Shergat and Babylon, I have the honour to refer to my despatch No. 30 of this date, and to add the following remarks

2. I know the German house at Habylan well. It is by no means unduly large for three persons, and visitors to Babylon are rather frequent nowadays. In my " I have not Olmin 1, 5 1 5 12 1-72 seen the house at Kela Shergat, but I am making discreet inquiries about it.

3. As regards the German steam-launch at Bardad, I have already reported to your Excellency about it before and after its arrival here used my despatch of the 7th March, 1905). It has only been used a very little in the river just in front of

Baggiad; it has made no long journey. It is folia week to week in faint of the German Consulate flying the German flag, and is illuminated on fête days. It has very little free-board and its speed hardly exceeds 4 knots. It is a poor thing, which would hardly be acceptable as a gift, and is only sunted for very amouth water. It has not been wrecked, but it has twice essayed the role of a submarine-hoat. The last time it went to the bottom of the river, it was cleaned, repaired, and put together by Herr Koldewel, the head of the excavation party at Babylon, who seems to be rather an expert mechanical engineer

I have not heard of any larger boat coming in its place, but I thank it is not

improbable that an attempt will be made to reprace o by a larger vesse.

4. The archeological parties at Babylon and Kela Shergat are certainly will supplied with funds.

I have been watching their preceedings with interest ever since I have been here, but there has been nothing definite about them which I have not already brought to notice.

I have &c. L. S. NEWMARCH (Signed)

arrived here about a week ago, and was good enough to call on me to-day. In the course of our conversation, which it was understood on both stiles was

entirely private and unofficial. Dr. Zander said that he understood that what Great Recam wanted was the construction and working of the eastern and of the railway from glad south; that he had personally no objection to this arrangement, but t a The state of the s

riens on the subject he very careful handling, vis., the necessity of coing nothing to excite the mistrust -! -e Soltan, or read him to believe that the Gorman Synd cate was coding to Engiimportant part of the concession which they had obtained for themselves. If was not maknown to me how suspectors His Majesty was of British action and influence to those regions, and how essential it consequently became not to arouse his susceptibilities or (com. He (Dr. Zander) believed bimself that we could come to an understanding which would give un the fall control of the construction and explorest on of the line, once we could derice a formula which, while leaving the Germana estimably in the emorment of the concession, would give England all the rights, privileges, and guarantees which she required.

The Ragdad Railway Company could wast a short time to see if it were possible to come to an understanding with England and France, but they could not stand still indefinitely, and must at no distant date go on with the construction of the line. He was thus parurally approus to know if I could give bim any indication as to the views and intentions of the present Government in regard to the general question of participation with the Germans and French.

I said that The Majesty's Government had scarcely been long enough in office to have had tone to consider this question, but that no doubt it would come within their purviou at no distant date, though I could not may definitely in what way or at what

I m x r t Mr. x tr - - - - - - - - open mind, and with a strong desire to come to terms with Germany if they could possibly do so on terms consistent with the communical and other latercals of the constav

The question had not, however, bean touched upon for some months, and the last reference I had seen to it was in the shape of a private conversation between Mr. Gwinner and Sir Edward Law.

Dr Zander concluded by saying that he hoped both Great Britain and France would join in the undertaking, but that if they did not come to some decision within a reasonable time, it would be impossible for Germany to hold open the door indefinitely.

I can take no exception to Dr Zander's opening remarks respecting the district unfortunately entertained by the Sultan of England's intentions in the neighbourhood of Bagdad and the Perman Gulf, nor do I think that he referred to the point to protect the special interests of Germany, but mentioned it simply as a factor that demands come that on

I have already, and notably in my despatch No. 217 of the 28th April, 1908, so fully explained my views and opinions of the advantages, under conditions which would have to be executly studied, of British participation in this great rulesty enterprise that

not trouble you with any remarks on the general question which would be mainly a reposition of those which I have already made. I venture to say once more, however, that I believe the railway will probably be constructed with or without the participation of the Anglo-French groups, although obvious y in the latter case in circumstances of greater difficulty. I forther believe that the sand in running out, and if we decide that it is in one interest to join in the construction of the railway together with the french without where participation I should be reluctant to do no—I hardly think we can expect a more projections moment for opening negotiations. It is improbable that the lift they autmount the office ties, financial and other, attending the construction of the

Three rings, and once each the open plain beyond it, will be willing ptable terms. These difficulties now from very large, in view of the condition of Ottoman finance and the concentention in the Pacis B urne of Turkish Storibut a perusal of the careful Memorandum prepared by Mr Mark Sykes (inclosed in a despatch No. 187 of the 20th March) will show that they may be overcome by judicious financial manipulation and by the personal influence which the German Ruperer is sure

to bring to bear on the Sultan,

I believe Dr Zander to be actuated by a sincere districts see both England and incompetition of immediate difficulty and ambarmament, while at the same time it would offer sterling accordance to the Germans from various points of view. He to doubt realises the political and material advantages of our good will from Bagdad Jown to Kowell, and in fully aware of the obstruction which may be felt should the terminal station be among the territory of the Sheikh Moubarak, with whom, he well knows, we have appears agreements nor does he lose sight of the material benefit to the railway should his Majesty's Government decole to send the British Indian made by this route, life knows and recognizes the importance of our interests and influence in the region of the Ferman Go I, and profess an amorable compromise to a struggle which might be fruitful of danger to both parties

the asso realizes the importance of the good-will of the French Government, without whose support he cannot expect to obtain a quotation of any Ottoman bonds that may be used in payment of the construction of the rankay, and he is well aware that without the co-operation of the Two Powers, bis labours to obtain security from the Ottoman Government for a kilometric guarantee will be immossely increased.

The novaetages to Great Britain of a concession giving her the right of constructing and working the railway from Bagdad to Kowert are distinct and palpable. It is not so clear where French interests come in under the arrangement proposed by Dr. Zander. Evidently some componenting advantages must be found for France, and the injection is not one of easy soution.

In view, however, of the fact that the extension northwards of the existing French supstem is rapidly being pushed forward, and may even be completed by the end in mer as far as Aleppo, where a junction with a branch of the hagdad Rashway andy to be created, it is possible that the French would be willing to take over the construction of the line from that point to Diarbekir, Mosoul, or Tekrit, which last-named place would be a favourable point for in to start from. This, however, in only an idea which has crossed my mind, but I noticed that it did not appear to meet with instancer from the French Anda wader, to whom I neutroned it casually as a possible arrangement. The idea was new to him, and his remarks cannot therefore be taken as representing the views which either he himself or his Government might hold when the point came to be studied in all its hearings.

Both M. Constant and I were, however, of opinion that the moment had come when the whole question of co-operation with the Garmans must be somewhy examined, and in the event of a decision being taken adverse to participation, I venture to think that

a purely German enterprise

I have reason to believe that recently M. Auboyneau, one of the Directors of the Imperial Ottoman Bank, knye the German group to understand that if the Algebras

Conference came to a satisfactory usue, the bank would be ready to confer again about the Fagdad Railway. I learn, however, from M. Constans, that up to the present moment no overtures have been made from Berlin, but I venture to submit that in the event of an exchange of views taking place between the French and German groups, we should be prepared to define our attitude on the general question and to indicate in broad lines the conditions of our co-operation.

There can be no doubt that the Russian Government will regard with disfavour a combination by which Great Britain and France will participate in an enterprise which they have always viewed with suspicion, and which, were they in a position to do so, they would oppose with all their former vigour and nostraty. So far as I know, however, the French Government is not disposed to pay much attention to Russian susceptibilities

in regard to that matter.

In the review of the situation it ought, perhaps, to be mentioned that no steps have been taken for the construction of the ratinary beyond Eregit. The Germans appear to abrunk from facing alone the enermous cost of the next section across the Taurus range, and if they are unable to obtain assistance they may find themselves forced to seek another combination briolying less expenditure by avoiding the mountains. Such a combination may be found by the construction of a line four Eregii, or more likely from some point west of Eregii, direct to Mersana, whence by utilizing the existing Mersana-Adams Railway, in which they have recently obtained a controlling interest, the one can be continued eastwards on the route originally planned

Constantinople, April 10, 1906.

DURING the course of the pro anged negotiations connected with the amendments of the Mining Law, I was fully aware of the privileged position secured to the Germans. by Article XXII of the Ragdad Railway Convention and of the effect which it would have on Bestish mining enterprise to the rast regions traversed by the line. That Atticle states, "Le concessionnaire aura la faculté d'exploiter les innes qu'il aura decouvertes dans une some de ringt kilom, de chaque côté de l'axe de la voie, en se conformant aux lois of Regioneuts y colatile, of same que cela constitue pour lei on privilège ou un monopole i it is, indeed, probable that, if strictly interpreted, the saving clause providing against a monopoly by the Company would scenre to a foreigner his rights and privileges derived from first discovery of a mine within the 40 kilom belt. but, on the other hand, there can be little doubt that in face of the special advanta . possessed by the Radway Company, competition would be difficult, if not altogether fruitless, even under the conditions of the new Min og Law, It was with this attention in mind that I restorday discussed the question, in all its bearings, with Mr Edwin Whitali, the head of the firm of Whitali and Company, with a view to discovering what steps, if any, could be taken to make good the rights of British subjects to permit de repleyches to case of the discovery of union which had not been applied for by the Karlway Company or their associates. Mr. Whittall then revealed to me that he had been in communication with a German Symboate of which the Dentsche Bank in a predominant member, for the working of mines within the railway's perrioged some, d that he had come to an agreement with the Germans for the formation of an Augis-

German Syndresto according to which to per cent, of all mining undertakings would go to the English and the remaining 55 per cent, to the Germans, while it was further provided that the agreement should affect not only the privileged area, but should be extended to mines discovered by either party in other parts of the country.

South African mane-owners, was already in course of formation in Landon, and that he had no doubt of obtaining all the financial support required for the development of such mines as they discovered. In his opinion, Asia Minor would, before very long, be the South Africa of the northern hemsephere as regards mining enterprise.

He regarded the new Mining Law, which the Embassy had succeeded in obtaining,

as a great strouglant to such undertak ugs.

it is with extreme intesfaction that I report this arrangement, as it will, in all

probability, open a fruiful field for the profitable employment of British capital will, moreover, remove a competition which, while injurious to the financial interest both parties, could hardly fail, in the course of time, to produce serious friction, especially when mining developments extended to the southern districts of Anatolia and to the rich in-fields near Kerbela.

Mr. Whittall requested me to regard the information be had given me as confidential, as the negotiations are not yet completed, and it is not desirable tout the

Ottoman Government should be aware of them.

## N. O'Conor to Sir Edward Grey,-(Received April 23

(No. 259.) Sir.

Pera, April 17, 1906

I AM informed that Dr Zander, the President of the Anatohan and Bagdad Radway Companies, has just succeeded in obtaining a protone from the Sultan of a concession for a scheme of irregation in the plana of Koma by water obtained by draming the matchy area, extending to some 80,000 decreases (15,000 acres), in the neighbourhood of Lake Karavila (Beyshehir), a project which the Gericons have had in view for some time past. The consideration for which the concession is to be granted in independent to be an advance of 23,000,000 fr to the Civil List, while, on the other hand, the Anatohan Radway Company is to receive 50 per cent, of the profits of the under taking. Detailed information of the scheme next present lacking, but as the negotiation have now reached a point where success appears to be certain and secreey no longer torcessary, I he pe to be shortly in a position to report further on the matter

The Germans, as a rule, innuage to work their designs very quietly and secrety, and, as an instance, I may mention a project new being inflied of for a radical front K and to Erzeroum. As early as December last I received information from 14 Jowett, at Sivas, that a party of engineers under M. Linding, of the Anatoman Radiway Compached recently arrived and was engaged in autyrying a route in Erzeroum, via Sovas and Erzeroum. I requested this hippory is Comoul at Erzeroum to inquire as to the proceedings of the party, but Mr. Shipory was no more able than Dr. Jewett to obtain

any relamentan from the focal anti-orities as to the of joil of the survey.

A copy of Mr. Surphy a despatch, which shows the reste followed by M. Daudrix,

is melosed herowith.

#### Inclusive I in No. 14.

#### Canaul Stopping to Sir N. O Cana

Erseroum, Morel 7, 1906

WITH reference to your Excellence's despatch of the 19th January last, requestar it formation respecting the work and proceedings of a party.

M. Dim ha, the engineer of the Anatolian Radway Company, his Secretary, M. Sugar

with two Turkish officers who have been engaged in the work of surr

from Erseroum via Erzenjan to Sivas, I have the honour to treasunt to your Excellency the following particulars which I have obtained from correspondents at

Error in and other places on the route

It should be stated that from Erzeroum to Erzinjian there are two roads for ordinary traffic, viz., the first from Year Han, Ashkale Embourt, and helaid Telefithk, the second, which is sherier, branching off at Year Han (about four hours from Erzeroum), and, after passing through the village of Mania Khatoun, crosses the Eughrates at hour Keupri, whence after shirting the topiker or Djebidge range, it proceeds through the plate of balaban to Erzinjian. M. Dauda and his party,

however, according to my informant, adopted neither the Bulbourt nor the Mania Khaloun route, but, after proceeding from Erzeroum to Askbulé by the ordinary roud, kept, on leaving the latter place, to the bunks of the Kephrites ad the why to Erzinjian, passing through the above-mentioned Kotur Keupri, the villages of Karghin, Vidjan, Hahl Agon Han, and the Bulboun plan. From Erzinjian onwards to Kemakh (a distance of some twelve hours), a survey was made of the road on both sides of the Euphrites, including an examination of places suitable for the construction of averbridges. About one hour before reaching Kemakh there is the junction of a stream called Keumur Tehai with the Euphrites, and from this spot, if the information supplied to me be exact, the engineers made two surveys of a line to Sivas, one in a northerly direction by Gerdjanis, Sou Shelir, and Enderis, near Shebhari Kara Hissar in the Sivas Vilayet, the second, westwards through Zuman to Divright

The above details are, I fear, of a somewhat scanty nature, and the forwarding my report to your Excellency is due to the fact that, such as they are, I have been entirely dependent for them on correspondents in outlying districts, no information being procurable at Exzercum. Name Pasha, the Governor-General, i roply to a question which I put to him on the matter, stated that no report from M Pandix had reached him as to the results of the latter's proceedings, his own

instructions having merely been to furnish all the needful facilities

As regards the question of the eventual possibility of the line being constructed or, if made, of its giving a reasonable return on the outlay expended. I have not sufficient insterial at my disposal to form an opinion. In view, however, of the great distance which such a line would have to traverse, it to considered by some that the additional facilities thereby afforded for the expert of Eriseronia grain would, to a great examp, be neutralized by the heavy freight which would necessarily have to be paid On the other hand, the advantages from a military point of view of connecting Erzeronia with the already existing American Railway system are obvious, and it is felt that if the line in constructed at all it will be from considerations of the anexy nature. A less bitsome project which, I understand from Nation Packs, has already been sunctioned, is the construction of a carriageable road from Erzeronia through lapte to Risch and the Black Sea. This would not have the military advantages alluded to above, but as its length, compared with the road already existing from Erzeronia to Frebrond, would be about one-half, the increased facilities which would thereby be afforded to the trade of Erzeronia with the extensor and to the trade with Persia are obvicus.

I molom, herowith, the stinerary followed by M. Dnucks and party from Erzeroum

to Eranjum.

No. 15.

Sir N. O'Conor to Sir Edward Grey .- (Received April 30.)

(No. 276. Confidential.)

Constantinople, April 24, 1900.

WITH reference to the paragraph in my despatch No. 243, Confidenced 12th instint, in which I mentioned that the German group representing the

may add that during his recent visit to Constantinople Dr Zander requested Mr. Edwin Pears, the Charman of the Company, and Sir William Whitail, to retain sents on the Roard, and both these gentlemen have accepted the invitation. I understand that Dr Zander thought it desirable to secure the legal knowledge of the former, who is the leader of the British Bar at Constantinople, to explain the legal tordinicalities with which the statutes of the English Company abound, while the experience and knowledge of the latter, as senior partner in an old-established exporting firm in Asia Minor, made him a desirable member of the Board, and possibly would predispose both these gentlemen to regard with favour any scheme making for the co-operation of British capitalists in the Bagdad Rashway.

I have, &c. (Signed) N R O'CONOR

## It chours in No. 15,

## Memorandum

(Cold lential.)

EARLY in December 1905 Boron de Vandeuvre, the Vice-Charman of the Mersusa Adana Bailway Company, left Constantinophe for Berlin, where, after several with Dr Zander and Herr Gwinner, acting on helialf of the Anatoban Luthway Company and Doutscho Bank respectively, he came to an arrangement by which he undertook to place those Companies jointly in possession of a subscient number of ordinary and preference shares of the Mersina Railway to command a majority of volue at general meetings of the Company

The total voto-carrying share capital of the Mersian Company at that time was 401,000/ nominal, i.e., 8,250 ordinary shares of 20% such, and 118,000 preference.

sharos of \$1 ench.

Five ordinary or ten preference sharm confer a vote on the holder so that the total capital represents 2,807 votes, etc, 1,650 and 1,157 belonging to holders of ordinary and preference shares respectively. A bare ansiority of votes being thus 1,404, and on therman group being already able to command 50%, shares representing 808 votes. were required, and under the agreement Baron de Vendeuvre had to hand over the requisite number of charm before the 16th January, for which he was to receive 214,8207. He was further communicated to purchase any number of preference shares. at a maximum price of 15t 1to, for one month after the above operation abould have been completed

There is every reason to believe that the agreement these concluded was the result of negotiations that had been on foot for some time. At all events, within a few days of has return to Constantinople early in January, M. do Vendeuvre was able to deliver the slarten and the transaction was furthwith completed. I could not ascertain the exact proportion of ordinary and preference shares acquired by the German group, but et is prantically cortain that the majority are preference almost, which as an investment are more probtable than the ordinary, and for the same capital outlay give a greater toting power. A large proportion of the shares required were obtained by M de Vondenven from another member of the Board, also a Franchinan, named

Throughout the transaction, by which he is reported to have cleared as much as 30,000, M. do Vendeuvre kept his colleagues on the Board in ignorance of what was going on, and they only learnt of it on his return to Constantinople, when the transfer of the shares was on the point of burng made.

The Gorman Group now control about 1,440 to 1,450 votes out of a total of 2,807.

Mr. Spring-Rice to Sir Edward Grey .- (Received May 11.)

No 88 } (Telographic) P

St. Petersburgh, May 11, 1900.

BAGDAD Railway I hear with reference to Mr Grant Duff's telegram of the 9th instant that Herr you likelien is about to be sent to Constantineple to take charge of affairs of Raginal Railway, whence he will go to Persia.

I am told the German Government will probably not apply to foreign Governments for aid, being confident that they will be able to complete the radway themselves.

[16252]

No. 18.

Su Edward Grey to Mr. Spring-Rice.

(No. 88) (Telegraphia.) P.

Foreign Office, May 11, 1900. BAGDAD Railway. In conversation with Count Benckendorff I have urged that Russian Governmany and a state of a region to the repetitive period by the section of the secti ser in the contract of the service seen; that we shall not participate without France, and do not wish to do so without

In these circumstances we should consider favourably any proposal as to conditions or methods of possible Russian co-operation.

A detailed account of this conversation will reach you by messenger.

No. 19.

# Sir Edward Grey to Mr. Spring-Rice.

(No. 213.) Parenga Office, May 11, 1906.

I REMINDED Count Benckenderff, in conversation to-day, that, since receiving the friendly message from Count Laundorff some weeks ago, indicating that proposals might be made by as for a definite agreement on matters of mutual interest, I had postponed the idea of our making any such proposals, owing to the change in progress in the Russian Government, and the latter's natural precompation with internal affairs. But within the last day or two a report had reached me that Persia was negotiating with Germany for a loan. I had originally told Count Benckendorff that, as regards l'organ and other subjects of that kind, we would for the present do our utmost to preserve the status que in order to keep the door open for a subsequent arrangement A to harm to be status que & at a che the the state of th it would make a future arrangement more and more difficult, and I had therefore thought it right to tell Count Bouckendorff of the report which I had heard

I said it was for the Russian Government to consider what steps they thought it in their interest to take. I held that it was wasting money to lend it to the present Person Government. But I did think it very desirable to preserve the stoice que. Possibly a joint loan by Russia and Great Britain might be worth considering as a And the same and address of the same of whole question, though I thought Russia, by conditions she had already made with Forum, might have grounds on which to object by herself to the Persian Government a

contracting a loan.

t can't Beackendorff asked me whether the information with regard to a German loan came from a source which made me believe it, and how it was being arranged

I mad the report had reached me in the barest possible form. A million was named as the amount of the loan. But I was not sure eren as to the amount, nor did I know through what channels it was being arranged, nor was I cortain of the conditions which might be attached to it. I did, however, think that the report which had rea had me might not be without foundation, but the Russian Government no doubt had means as good as ours for making their own inquiries.

There was another matter which it was necessary for me to mention.

The Raginal Railway had not recently been brought before us officially in any way but I gathered that it was likely to be revived. Questions were being asked me in the House of Commons, and from other indications I expected that we might seen have to to parturpate in it indom France also did so, and we did not wish to go into it unless Eusein as well would take part. The Bugstad Railway, if completed, would form an emportant commuresal autiot. I know very well the interest which such an outlet had s had for the Russian Government, and I realized that if this outlet was to be e on the Person foulf it was something in which they would naturally feel they ought to have some share. It was for them to consider, therefore, whether it would

destined to be made nevertheless, that they should make up their minds as to the conditions and methods by which Russian interest might be brought into the schem-All I had to say was that we would consider very fav airably any suggestions of this

kind which the Busian Gevernment might have to make

I told Count Benekenstorff I did not with this to be regarded as an official commumention, because at present we were not being asked for any decision; but I foresaw that we might have to come to a decision before very long, and, as this too would be an alteration in the status quo in a part of the world in which we were both interested. I was anxious to take no step on our part without fetting the Russian Covernment know, and it was very described that they should come to a decision as to what their own interest and policy in the matter abould be

Count Benekendorff told me that M. Cambon had already had conversations with

Inm and M. Nelelolf on this subject.

I said I had spoken to M. Cambon some time ago, but my reason for monitoning it now was that the questions which were being asked me in Parliament made me think that the time when we might have to come to a decision was nearer than I had thought, and it was desirable that the Russian Government should also be prepared.

No. 21.

Str N. O'Conor to Sir Edward Grey .- (Received May 21)

(No. 330, Very Confidentia).)

Constantinople, May 14, 1906

THE following observations on the prospects of the Bugdad Radway, recently made to a friend by M. Testa, who, as German Delegate on the Ottoman Public Deht and ex-First Dragoman of the German Embussy, is well acquainted with the question

in all its financial and political napocts, are of considerable interest

The German Engineers have carefully studied the problem of an alternative route for the railway, so as to sveid the mimouse and costly work of the "trace" laid down to the Concession, and have arrived at the conclusion that the proposed route, with some modifications, is the most feasible. The idea of crossing the range further west and linking the bas with the existing Mersina-Adana radway has been abundaned, tr. tr. tr. tr. tr. because the line, as originally mactioned by the Sultan, was laid down so as to be safe from attack from the sea, and His Imperial Majesty would never assent to a deviation which would bring the rollway to the south side of the Taurus for so long a distance

The contemplated project for communicing work on the sections east of Adams and leaving the Taurus section untouched for the present has also been renounced. Although there is no express supulation in the Concession that the line is to be built continuously contward, it was clearly understood at the time of the signature of the Convention that this condition would be observed, and the Germans admit that they do not behave t r ra who will be and refer to be

to consent to depart from it.

The Germans have not made any step yet towards raising the construction leans To the state of th 511 " 4 6 4 7 6 4 7 so the same of the t to the the test of the test . I the art for I have the N R. O'CONOR (Signed)

St. Petersburgh, May 24, 1906.

I HAVE the bounger to state that M Isvolsky told me vesterday that the news as regarded the Shalt's health was better. There therefore appeared to be no present reason to take serious steps. He said that he had no doubt Mr. Grant Duff had already received instructions to set jointly with his Russian colleague in support of the Vali Abd's succession to the throne. He had himself seat corresponding instructions to the Russian Charge of Affaires at Tehran. I observed that it might be advisable that the two Legations should have a certain sum at their disposal in order to concluste the

the Shah. On the occasion of the present Shah a accession the question of a largesee to the troops had proved a serious one, and it was as well that the two Governments should be prepared to take steps if necessary. He agreed in principle, and said that M. Hartwig.

tions in regard to the matter? I mentioned the conversation which you had with the Russian Ambassador on the 11th instent, in which you had spoken as to the possibility of a joint loan. He said that he had received a report of this conveniation, and that he Way a c 

the information at his disposal was not sufficiently definite to warrant a decision. He had the whole subject under his consideration, and would inform you later when he had been able to master the subject

-----

at the German Ambasonder had called upon him to

facts to

I is was the subject of a Concession granted by the Suban to the Deutsche Bank, and was therefore specifically a German interest, as to which Germany had every right to be consisted. M Involuty bad, he said, immediately telegraphed the substance of this conversation to London in order that it might be en toute franchise communicated to yed. He regarded the communication as unsatisfactory, as it showed that Germany had, as a matter of fact, no objection to an entente between England and Russia. With regard to the Bag lad Radway, he considered that the contention of Germany was just, and that German claims ought to be considered. I said that you had never left any room for dealt in all your communications on the subject, or in the communications made through Sir Charles Hardinge, that in seeks

in essumpa with Prance, in the outerprise inaugurated by Germany. We had hitherto refused the German offer to participate mainly because we were not willing, as long as Russin was opposed to the project, to enter into a combination which Russia in ght regard as an unfriendly act. Should Russia withdraw her objections, we should, in common with France, he more willing to give a favourable answer to the proposals for financial participation, if in other respects they appeared so

indeed, as the Concession was a Corman one, was impossible. M breelsky and that at first night he thought that the views expressed by

Far and the second second utuable to give a definite answer until the competent authorities had been consulted

I subsequently spoke to the French Ambassador on the subject. His Excellency said that he had not montioused the matter of the Anglo Russian negotiations to MI I was more sure of his 

M Isvolsky, Count Witte, and the Dress of the Country of the Count given a favourable answer in principle, but had reserved a definite reply until he . Id have consulted the competent authorities. Count Witte had informed him that on recommendation he had changed his mind with regard to the matter, and was now prepared to recommand Russia to withdraw her opposition. The same suswer had is received from the military authorities, who no longer appeared to consider that the construction of the line was injurious to Russia's inditary interests. M. Bompard said that the Director of the Deutsche Bank at Constantinople had approached Sir Nicholas O'Conor with regard to the participation of English capital, and that he had subsequently proceeded to Paris, where he had made a similar proposal with regard to French participation to the Directors of the Ottoman Bank. It was noticeable, however, that the offers had been soiely made with regard to financial participation, and the inducements put forward were solely those incident on the issue of a loan in Paris. Nothing had been said either of the industrial advantages incident on construction, or on political or commercial control, or participation in control.

With regard to the general question M Bonipard made the following remarks: The denial of the intention to offer a loan to Persia, if made by Germany, would correspond exactly to Count Tattenbach's termilar dental of the intention to make an advance to Morocco, a denial which did not as a matter of fact, prevent Germany making an arrangement which was hardly distinguishable from a loan. The steps taken by the Director of the Deutsche Bank pointed to the desire of Germany to obtain The state of the s co-operation to one of a purely financial nature. The Government, however, could not and would not participate without giving due consideration to the general, commercial,

and political aspects of the question. With regard to the question of the observations made by Harr von Schoon as to a repprochement between England and Russia, similar friendly observations had been made on to the supprochements made between Italy and France, between Austria and Russia, and between France and England. But it was not to be desired that in all these cases Germany had been unturing in her afforts to destroy the force of all there agreements, while protesting publicly that also regarded them with favour 

sentiments of Germany, the two Governments should not lose sight of the fact that the

to the furtherance of harmony. The two Governments should act for themselves according to their own interests. They should, of course, make it plain that their efforts to come to a mutual agreement did not and could not entail any consequences injurious to any Power which macerely deared peace. But they should act not through intermediation, but directly, unless they were anxious to pay somewhat heavy bre korage.

He pointed out further that, so regards the Bagdad Railway, it was not admirable that the three Powers (France, England, and Russia) should act separately, by separate and independent negotiations, with Germany. They should act as a unit, and if they did so the terms obtained would be better. For this purpose it was most necessary hould come to a common understanding as some as possible. This is said,

may hostile feeling towards Germany, but from the purely business point of

He added that, although, as he had told me, he had not thought it advisable as yet to speak on the subject of Anglo-Russian relations, which he had abstaced from doing, because he was not yet sufficiently clear as to the policy which would be pursued by the new Government, and because in principle he thought it was better that Russia and England should hight out their battle by themselves, on the ground of their own private assured that they might count on the friendly and willing co-operation of their French

by the offices of a mutual friend. I said I was sure that in the future, as in the past, his friendly offices would be appealed to if the occasion arose.

Sir Edward Grey to Sir F Bertie.

Foreign Office, June 8, 1906

THE French Ambassador called on the 1st instant, and, under instructions from his Government, stated that the French Minister for Foreign Affairs had told Prince Radolin, on the 30th ultimo, that he had heard from St. Petersburgh of the demorate made by the German Ambassador respecting the Bagdad Radway (see Mr Spring-Rice's despatch No. 329 of the 24th natimo). M. Bourgeous had added that he wished to assure him that, since the Concession was a German one, he had no intention of taking any step in the matter, but that it was for the Germans to take the initiative, and that the French Government or bankers would then be ready to discuss the question with them.

[21066]

Question asked in the House of Commons, June 13, 1906.

No. 26.

If Lynch,—To ank the Secretary of State for Foreign Alburs whether he is aware that it is proposed to apply the funds at present absorbed by the deficits in the Macedonian Budget, and which will be set free by the proposed increase in the customs duties, of which the greater part are invied on British trade, towards finding the kilometric guarantee for the lingual Radway; whether his Majesty's Government adhere to the declaration made by Lord Lanadownse that it shall be a condition of their consent to an increase in these duties that the expanditure of the money so obtained shall be controlled by a compotent body controlling also the finances of Macedonia; and whether he will take steps to secure, firstly, the regulation of Turkish military expenditure in Macedonia, and secondly, the ition of the principle that funds derived from an increase in the customs shall be devoted, after satisfaction of the needs of the Macedonian Budget, to the promotion of foreign trade with Turkey in general, and not to the setting free of revenues for any particular enterprise.

#### Answer

In reply to the first part of this question, Ilis Majesty's Government have no control over Turkish revenues, the allocation of which has not formed the subject of any Agreement between the two Governments.

The increased revenue-less the 25 per cent due to the bondholders—will, under the arrangement now under the consideration of the Porte, be devoted to meeting the deficit in the Macedonian Budget, which is already under the supervision of the Financial Commission. The establishment of this Financial Commission was accepted by Lord Lansdowne as the best control that it was practicable to obtain

3. We have not supulated for the regulation of Turkish multary expenditure in Macedonia, but the Turkish Government have undertaken to make good from Imperial Lands all defects in the Macedonian Budget, whether due to multary or civil expenditure.

As at present estimated the increased duty will be more than absorbed by Macedonia, and there will be no funds from this source for any other purpose; but, as Majesty's Government have made some conditions which will be to the advantage of foreign trade.

England, France, and Russia were to come to an agreement as to the terms on which they were willing to participate in the Railway, it would be easy for the French financial group to reopen the question with the Germans on the terms to which these three Powers might have agreed. He thought this would be the most convenient way of reopening the question.

lie said that there would be difficulty in making any arrangement by which the southern section should be entirely controlled by England. The placing of one section under the control of a particular Power might give rise to difficult questions respecting the control of other sections, and would not be altogether in accordance with the general character of an international undertaking. In addition to this, he was sure that the Sultan would never agree to a concession of this section being given to

England alone

I said that statements had appeared in the press to the effect that we should stipulate for this or that condition as essential to our co-operation, but that these statements had not come from the Foreign Office. As a number of fact, that to which was secured by the co-operation of France, Russia, and Germany, as well as ourselves, I did not think difficulties would be raised by us with regard to the control of a particular section.

M Cambon and the Russian Government were very much precedured with

conversant with the whole question.

No. 24

Sir P Bertie to Sir Edward Grey .- (Received June 2.)

(No. 229, Confidential.)

Sir,

M. HENRY, Commercial Director at the Ministry for Foreign Affairs, came to see me this afternoon to tell me, on behalf of M. Bourgeois, that his Excellency had thought it right to speak to the German Ambassador on the subject of the inquirios made of the Russian Government by the German Ambassador at St. Petersburgh in regard to the nititate of Russia in the question of the Bagdad Railway.

M. Bourgeons had assured Prince Radolin that there was no intention or with on the part of the French Government to come to an arrangement either with Russia or with England, trospective of Germany, this holder of the Concession from the soltan of Turkey. The French Government recognized the special position of the concessionnaire. Prince Radolin had not volunteered any expression of opinion on the

question in roply to M. Bourgeois' assurance.

The Minister for Foreign Affairs had also, M. Henry informed me, had some versation with the Russian Ambassador on the subject of the railway, from which he gathered that the Russian Government had objections not shared by their Ambassador—to its construction. M. Bourgeon did not think that those objections had much force, and from some observations made by M. Henry I conclude that, whereas the Russian Government desire to put difficulties in the way of the construction of

Russian Ambassador is in favour of the projected Bagdad Railway, provided that it be connected with the Russian system

The eventual object of the Russian Government and the Ambassador is the same, though the means of obtaining the end are different.

# Question asked in the House of Commons, June 18, 1906.

Mr. Rees.—In ask the Secretary of State for Foreign Affairs whether he has received any official information that the German Embassy in Constantinople has made overtures to the Ports for the purchase or lesse of an island or station in the Persian Gulf; whether he has been officially informed of any negotiations between the German Government and that of Persia for a similar purpose; and whether he is officially aware of any application by Germany for a concession for a relief from Engdad to Khanakin, on the Persian frontier.

#### Answer

I have no official information which I can give to the bonourable Member on the subject.

[20199]

No. 28,

Sir A. Nicolson to Sir Edward Grey .- (Received June 13.)

(No. 115.) (Telegraph c.) P. St. Petersburgh, June 13, 1906.

M ISVOLSKY informed me to-day, in raply to a question which I put to him, that he was personally in favour of Russian participation in the liagded Railway, but he had first to obtain the support of the Ministers of Finance and War, and he would find could without difficulty be provided by the banks, but he said that he doubted whether the Russian houses were in a position to do so at the present moment, and added that he was convinced that it would be most undescrible were the railway to become a purely German enterprise.

In conversation with the French Ambaerador on this subject, M. Bompard informed me that the Chief of the General Stad had no objection to participation on the part of Russia, and be appeared to consider the support of this officer as of more importance than that of the Minister of War. He also said that a French financier, who is in St. Feteroburgh for a few days, had been sounded by the Minister for Foreign Affairs as to the possibility of making some combination with the Russian banks.

21029

No. 29

Sie Edward Grey to Sir F. Lascelles.

**\ 1** ,

Foreign Office, June 14, 1906

THE correspondent of the "Times" at Constantinople (Mr Braham) told me that, on his way through likelin he had had an interview with Dr Zander

Or Zander had told him that the tiermans saw their way to construct the next two sections of the linguisd Railway, but beyond that they were not prepared to go alone. For them to construct a railway to the Personn Golf, which might meet with the

evofore, for English co-operation, and recognised that, in order to have it, England must control the southern section of the line.

I absorred that we did not appear to have so great an interest in seeing the line made as to encourage us to mean the hostility of Russia either, and that if this was the Corman view it was obvious that the participation of Russia ought to be desired. I further observed that the southern section of the line would, as at present arranged, go through a very unprofitable part of the country.

Mr. Braham and that Dr. Zander was quite aware of this, and admitted that the

route to be taken by the line would have to be altered.

I am, dc (Signed) EDWARD GREY. 205081

No. 80.

Extract from the "Times" of June 15, 1908.

MACEDONIA AND THE BAGDAD RAILWAY.

To the Editor of the " Times."

Bur, House of Commons, June 14, 1906.

I HOPE I may be mistaken as to a single point in connection with the reply given by the Secretary of State for Poreign Affairs yesterday to a question which I put to him on this subject, and I have placed a further question on the paper, which will, I trust, clear it up. But the matter which I brought to his notice is so urgent that I feel it my duty to troopses upon year space in the endeavour to obtain at least a second hearing of an issue which would seem to be of far-reaching intional

emportance.

It is proposed that this country should consent to an increase of 3 per cent, in the customs duties, fixed by Trenty at 8 per cent, which are levied on imports into Turkey. It has been estimated that at least 60 per cent of the Turkish customs are levied on British trade. It has also been calculated by the Foreign Office that the suggested increase of 3 per cent, would bring in an additional revenue to Turkey of about 750,000 a-year. Of this sum, 25 per cent, must, under the Decree of 1903, be applied to the reduction of debt, but the remaining 75 per cent, or 550,000 a-year, would flow direct into the Turkish Trensury. The proposal is that this 550,000 a-year, would flow direct into the Turkish Trensury. The proposal is that this 550,000 a-year shall be car-marked to supply the defect in the Budget of Macedonia defect amounted in 1904 to about 720,000. Economics have, however, been cause 1964, so that the Macedonian defect ought now to stand at about the same figure as the proposed additional revenue from the customs of Turkey—vic., 500,000 The one will about balance the other

Let us proceed a little further. The Maccionian deficit has hitherto been made up by Turkey out of her Imperial funds. It seems to follow, therefore, that these funds, to the extent of about 600 0000, a-year, would be set free for any purpose to which Turkey may desire to apply them in the event of the proposal being sourtioned for an increase in the customs duties. It is end-bly reported from Constantinopae that these funds thus to be set free are to be applied to fluding the guarantee for the Baglad Railway. At the same time, by a significant considence, the question of the bagdad Railway is being actively discussed in the German press. New your readers

are aware that the present condit on of that enterprise is briefly thin: -

A certain portion of the milway has already been built in Asia Minor as a branch of the existing Anatolian Railway, and still at a great distance from the regions which it is ultimately intended to exploit. The task now before the Germann is the comparatively difficult one of taking the line seroes the Taurus into the Mesopotamian plain. The money for building the existing line was derived from the proceeds of a can issued by the Turkish Government at 6 per cent, interest and taken up at about 86. I think I am right as to these particulars. If, therefore, the Turks on a log the whole of the money to be set free by the Increased customs to the Bag lad Radway. they would presumably be able to borrow to the extent of about 12,000,000%. Now, it has been estimated that the section of the radway already completed has cost about 5,000% a-mile, including rolling-stock. If we even allow double this aum namely, 16,000/ a-mile-for the 375 miles which it is now proposed to commence, and which, when completed, will have taken the enterprise across the Tourus and a long way on the ulterior journey towards the Person Gulf, we get a sum of 6,000,000, which is only half the sum mentioned above as the capitalized value of the revenues set free by the new customs duties if applied to finance the Bagdad Backway.

The nature of this vast enterprise, destined to place under German control, not only a great railway from the Bosphorus to the Persian Gulf, but also the railway system of Syria, which is being extended along the Egyptian frontier to Meeca as I

deny that it is of the utmost importance that this country should have a voice in the future development of this enterprise. Hatherto we have held several very strong our name. One or the saturgest is the momenty for obtaining our or particularly for our or particularly for our or particularly for our or particularly for our or particularly for

20618)

Mr. If hitchead to Sir Edward Grey .- (Received June 18.)

(No. 1711).

Beelm, June 13, 1906 I HAVE the honour to report that a communication from Reuter's Agency, at Constantinople on the 30th ultimo, and published in the "Times" of the th June under the heading of "Germany and Person," has called forth an inspired korrespondenz," and some comment in other papers.

It is stated in this rejoinder that the rumour to the effect that Germany was seeking a Railway Concession for the Kermanshah-Khanikin line is a purely fantastic suggestion. German enterprise has indeed secured a Concession for a railway from Raillad to the Persian Gulf, but no such right has ever been sought for in regard to railway construction on Persian territory

Similarly, the article characterizes as a mere invention the remour that the German Ambassador at Constantinople had approached the Porte with a view to obtaining by purchase or by a lease the use of the Island of Gobul or El Awul, near Bahrein, for a coaling-station, stating that Germany has no intention of acquiring

tslands in the Red Sea or in the Persian Gulf

The only part of Reuter's message which the communiqué to the "Suddeutsche Reutliskorrespondent" confirms, is that the funds for the construction of the Taurus section of the Bagdad Railway are already available, and that the assistance of foreign capital for this purpose will not be required

The "Berliner Tageblate" observes, in reproducing the above, that this rebuke to Renter's bureau and its English wire-pullers will not prevent randor tales of horror in regard to Germany's alleged schemes being circulated again to-morrow or the next

day, as this belongs to the business of Reuter's bureau and its promoters.

The "Frankforter Zeiting," in discouring Reuter's report concerning the islands in the Person Gulf before the semi-official rejonalor appeared, says that there is arobably no world of truth in the rumour, although there is no apparent reason why termany should not acquire coaling-state as in the Person Gulf as well as hagkand, provided she obtains the consent of the territorial Sovereigns concerned.

The Berlin "Lok annauger" observes that all endeavours to bring about more friendly relations between Germuny and Great Britain are repeatedly frustrated by circulation of russours, such as the present one, which are alleged to originate outside Landon, and which are calculated, if not intended, to create ill-feeling against

Termony.

The "Freie Deutsche Presso" of the 12th June has a long and violent article on the same subject, but as the paper is unimportant it is not worth reproducing.

(No. 36 L)

St. Petersburgh, June 14, 1906.

I INQUIRED of M. Isvolsky restorday whether he had come to any decision as to the participation by Russis in the Ragdad Railway scheme. His Excellency and personally he was in favour of Russia taking part, if possible, in the project, as he considered it would be undesirable that the ratiway should become an exclusively German enterprise. He added, that he had, however, to win over the Manisters of War and Finance to his views, especially the latter, who had objections in principle to Russia assisting in the completion of the undertaking, and who also doubted if the Russian Government would be able to find the necessary funds.

I observed that in regard to the question of finding the required capital, this could be arranged. I presumed, by Russian banks without calling upon the Government, but his Excellency doubted if the banks would be in a position to do so.

11. Bompard also spoke to M. Isvolsky on the subject, and volunteered to see the [1037]

Minister for Finance and explain the matter fully to him in order to remove the seruples and hesitations of that gentieman. This offer M. Isvolsky cordially accepted.

M. Bompard told M. Isvolsky that he feared his Excellency had acted a little hastly in soliciting the assistance of M. Noetzku, a French financier who had been here for a day or two, and who had been one of the French agents for the conclusion of the recent Russian loan. M. Bompard explained to M. Isvolsky that the financial group who were interesting themselves in the Bagdad Railway were the Ottoman Bank group, while M. Noetzian represented the Banque de Paris et des Phys-Bas, who had nothing to do with the scheme, and who were not on the best of terms with the Ottoman Bank. Confusion might be caused, therefore, by the Russian Government naking for the intervention and assistance of M. Noetzian. M. Bompard told me that he had seen the latter gentleman, and had requested him not to regard the suggestion of M. Isvolsky as a formal offer, and he had recommended him to take no netion apon it.

M. Bompard informed me that M. Isvolsky had stated to him that he felt confident of obtaining the commut of the Minister of War to the participation of Russis, but M. Bompard considers that, as the Chief of the General Staff him expressed his concurrence, the opinion of the Minister of War is not of special importance.

(No. 877.)

St. Petersburgh, June 10, 1906.

THE French Ambassador told me yesterday that he had called upon the Minister of Finance in order to explain to him the desirability of Russia participating in the baselad Railway project, and also with a view of endeavouring to overcome the objections which he understood that His Excellency had to Russia facilitating in any way the realization of a scheme which he considered detrimental to Russian

M. Rompard found that M. Kokovisoff was not to be easily persuaded, as he maintained that any line which facilitated communications with Persua would serious compete with Russian trade in that country. M. Bompard pointed out that the Chriman Syndicate would doubtless eventually complete the line even without foreign assistance, and that it would be advanish to participate under certain conditions before it was too late. M. Bompard instanced to His Excellency the attitude of Great British towards the Saca Canal construction, and her having subsequently found it necessary to acquire a share in that undertaking. These arguments del not shake M Kakovisoff a objections; and then M. Bompard moutioned to His Excellency an alternative, that perhaps Russia might feel disposed to construct a line herself from I at the Griff. M Kakovisoff observed that such a line would enable limitsh goods from the trulf to oust Russian trade from Northern Persu.

I do not quite understand what prompted M. Bompard to suggest the above a ternative to the Minister of Finance. I have never discussed such a project with 1-10, or intimated that it could form a subject for negotiation, but as it was described at once by M. Kokortsoff, I did not feel it necessary to make any observations.

M Bompard added that the Minister of Finance had also mentioned the difficulties which the Russian Government would experience in finding the necessary funds, and he had endeavoured to make it clear to M Kokovtsoff that these difficulties were by no means serious or insuperable. M Bompard said that he had received a letter from Paris augmenting him with the arrival in that capital of Mr Gwinner, who intended to discuss the affairs of the Bagdad Radway with the Ottoman Bank. He would, therefore, press M Invokky to come to a decision, as M. Kokovtsoff had stated that his a bjections to the project were simply those of a Minister of Finance having in view the commercial and financial interests of his country, which might have to yield to considerations of a general international policy.

My french colleague, I would beg feave to observe, under no pressure from me, evidently intends to push the matter as actively as he can, and I was in some doubt whether I should communicate to him the substance of your telegram No. 103 of the

Isth instant and give him to understand that, owing to information which had reached His Majesty's Government, it was not considered necessary that I should urge the Russian Government to come to a decision. On reflection, I thought it prudent to say nothing on this point until I had communicated with you, as the visit of Mr. Gwinner to Paris may be an indication that the German Syndicate are proposing to obtain foreign assistance towards completing the line to its terminus. I also thought that if I were at this junction to announce that I was instructed to hold my hand I might cause some confusion, and possibly misunderstandings.

I would, with your anotion, therefore propose to act with M. Bompard continuing to suggest to the Russian Government to participate in the project on such

conditions as may be considered describle by the three Governments.

I have, &c. (Signed) A. NICOLSON

P &-Since writing the above despatch. I have had the bonour to receive your telegram No. 112, and will be guided by your views as conveyed to me.

No. 40

Mr. Whitehead to Sir Edward Grey .- (Received July 23.)

(No. 133, Commorcial)

Berlin, July 19, 1906.

1 If AVE the honour to transmit to you herewith a copy in French of the seventeenth Annual Report of the Directors of the Anatohan Railway Company," which I have obtained through the couriesy of Mr. Consul-General Schwabach

I also inclose a short precis of this Report, in which the figures are reduced to sterling (25 fr. = 1), and £ T. = 15s. 02d.) and to English weights and measures.

I have, &c. (Signed) J.

J. B. WHITLHEAD

## Inclosure in No. 40.

Memorandum on the Secenteenth Annual Report of the Directors of the Anatolian Railway.

Company for the year 1005 (dated at Constantinople in May 1005)

Lase open to Traffic.—The length of line worked remained unchanged at about 613 miles (1,032 kitom.). The Company, however, also undertook the working of the ion of the Bagdad Railway from Konia to Eregh, about 125 miles, on while the traffic was conducted with safety and punctuality. The trains on the Anatematical Railway covered 956,661 miles in 1905, as against 964,439 miles in the preceding

Recopts.—The gross receipts of the main line from Haidar Pasha to Angers 9 miles) amounted to 285,8481 (212,6731, in 1994), an increase of 43,175

On the Eski Shelde Konin extension (276 miles) the gross receipts amounted to 141,821. (117,619), in 1904), an increase of 24,1751, or about 20 55 per cent. The receipts per mile rose from 4251 in 1904 to 5131 in 1905. The small branch line from Hamidie to Ada Bazir (less than 6 miles) is the only part of the line which shows a falling off in gross receipts. They amounted in 1905 to 4,3071. (4,712) in 1904), a decrease of 4051 or 859 per cent. The receipts per mile on this branch full from about 8421 in 1904 to 7701 in 1905.

The total gross receipts for the whole system amounted, therefore, to 431,9791 (365,034) in 1904), an increase of 06,945L, or at the rate of 18-84 per cent.

<sup>&</sup>quot; Not printed.

The mercase or decrease of gross receipts per mile from different kinds of traffic is shown in the following table:

	τ.	Ъ	An new
1	2	5 2 11	1 :
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	+	. 8	* * * * * * * * * * * * * * * * * * *

Traffic.—The morense of passenger traffic on the Hadar Past Andre exclusively due to the development of the suborban traffic from Constantinopic to the Princes Islands via Maltepe, in connection with the "Malsonise" steamers. This new service accounts for an increase of about 300,000 passengers. The remainder of the main line would probably also have shown as increase of passenger traffic had it not been for the police restrictions decreed in consequence of the attempt on the life of His Majesty the Suitan. On the Eski Shelar Koma line these restrictions decreed to the same degree, and there was a noticeable increase of ordinary passenger traffic, the decrease in receipts noted above being entirely due to reduced military transports.

The development of goods traffic has in general been satisfactory, the transport of grain alone showing an increase of \$3,707 tens, of which 25,391 tons were carried by

the Konn live Harking Expenses.—The ordinary working expenses of the whole line during 1905,

Galata, compare as follows with the preceding year ;-

f shetal expend have

Manerels are traction :

Taking all three lines together the average results per mile in 1905 and 1904 were as follows:—

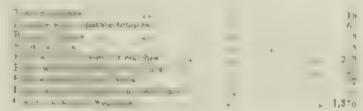

The working expenses therefore amounted to less than 40 per cent, of the gross receipts in 1905, as compared with over 45 per cent in 1904.

Extraordinary expenditure amounting to 7,134, was also mentred (partly for agency turn), and was defrayed from revenue.

The interest on the "Renewal Fund," amounting to 0.7071, was again added to capital, together with a further detained of 8,0001, from general revenue, so that the total addition to this fund for the year amounts to 17,7071.

hetometric tisarantee.—The nums paid to the Company by the Ottoman Government on account of kilometric guarantee for the year 1905 amounted for the Hadar Fasha-Angera line to 41.5666, and for the Fikl Shelor-Koma extension to 101,641. These sums were paid in full by the Administration of the Public Debt in January. 1906. The gross receipts of the Eski Shehir-Konis line exceeded for the first time the minimum of 446*l*, per mile contemplated by the Concession, so that the Government no longer paid the maximum of 118,982*t*, as kilometric guarantee, but 17,311*t*, less.

Rolling-stock .- At the end of 1905 the rolling-stock of the Company con-

There have also been ordered three further tender-engines for passenger trains, and one large engine for goods trains.

Finance.—The following alterations have taken place in the financial position of the Company:—

(a) The redescription of debentures has proceeded regularly according to the programme of amortization. The debenture capital, which originally amounted to 6.400,000% nominal, had been reduced on the Stat December, 1985, to 6,343,000%.

(a) In accordance with the Resolution of the general meeting held on the 30th June, 1905, and with Article 37 of the Articles of Association, fourteen fully paid-up shares and eighty-six abares on which 60 per cent, had been in preferenced by fot at a net cost of 1,3121, and "bons de joursance" issued in three place. The total number of redeemed shares on the 31st December, 1905, was 801, of a normal value of 17,880/

.) Taking advantage of the right conferred by the general meeting on the 25th June, 1993, the Bentsche Bank has taken up the 15,000 shares (No., 120,001 to 185,000) which were held in reserve. On these shares the lank has past up 60 per cont., thereby increasing the share capital of the Company by 180,000.

(d.) The repayment of the advance made to the Manutry of Marine on the 71 1905, the Company's claim still amounted to 137,0134.

Desiron of Profits.—The available surplus from profit and less account (including balance from 1964) amounted to 116,6762.

It was proposed to divide this sum as follows :-

Legrains reserve (and second special special second special second special second special special second special special second special special second special second special second special special second special second special second special special second special second special second special second special special second special sec

Three proposals give the shareholders for the first time a dividend of 6 per cent.

Management and Board of Directors.—Dr. Zander, who has been General Manager of the Company since 1897, has resigned in order to return to Berlin, where he was continue, however, to act as "Administrateur-Délégué." He has been replaced by M. K. Huguenin, who has been appointed General Manager and Delegate of the Board of Directors at Constantinople.

On the Stat December, 1905, the Board of Directors was constituted as follows :-

Arthur Gwinner, Director of the Deutsche Bank, Chairman,

R. Schräder, Momber of the Reschstag, &c., Vice-Chairman in Berlin.

C. Testa, Delegate of the German Bondholders on the Council of the Ottoman Public Debt, Vice-Chairman in Constantinople,

L. Berger, Delegate of the French Bondholders on the Council of the Ottoman Public Debt.

## Question asked in the House of Commons, July 23, 1906.

Mr. Rees, -- To ask the Secretary of State for Poreign Affairs whether the increase of the Torkish Castoms dues, if accepted by the Powers, and especially if the duties .... in future to be collected by a European administration, will enable the gold Rativay to obtain security sufficient to muce the r - cy for the construction of that railway; and, if so, whether the Magazy's Government, before giving their final coment to such increase of the Customs, will take steps to obtain a due share of control over the line

## Answer by Mr. Runciman (for Ser Edward Grey).

My right honourable friend does not think a forecast of this nature in regard to Turkish finance can rightly be made. The latter part of the question concerns a matter of policy, and it would not be in the public interest to make a statement on the subject. But he wishes to remind the honourable mumber that the Concession for the construction of the railway is the property of a German Company

No. 43.

Question asked in the House of Commons, July 24, 1906.

Mr. Hert-Device.—To ask the Secretary of State for Foreign Affairst whether he is in a position to make any statement as to the proposed Bagdad Radway; whether, in the event of the radway being prolonged to the Person Guif, he will consider the advisability of this extension being financed by British capitalists; and whether any negotiations are going on as to the proposed alternative termini of howeit and Khor Abdullah

# Answer.

No negotiatious are proceeding with His Majesty's Government in regard to the Bagdad Railway, and I have therefore no statement to make regarding it.

No. 44.

# Sir A. Nicolson to Sir Edward Grey .- (Received July 25.)

(No. 165.) St. Petersburgh, July 25, 1906. (Telegraphic.) P.

MY telegram No. 118 of the 18th ultimo Bagdad Railway. I am informed by the French Ambassador that the Director of the Deutsche Bank has returned to Berlin from Paris without any arrangement with the Ottoman Bank having been come to. He asserts that foreign assistance is unnecessary to the

completion of the line, and he is opposed to British participation, on the ground that

it would not be favourably viewed by the Turkish Government.

(25792)

No. 46.

Extract from the "Times" of July 27, 1006.

Debate in the House of Commons, July 26.

Mr. Bowles (Lamboth, Norwood) asked the Secretary of State for Foreign Affairs whether he was aware that the military expenditure of the Macedonian Budget was pery a car and the office of the car of the defrayed out of Turkish Imperial funds; that any increase of Turkish Customs duties and whother, in view of the importance of this matter to British interests, he could atalo the grounds upon which he based his opinion that such funds, so set free, could not be used towards finding the guarantee required for the Hagdad Radway

Sir E. Grey.-His Majorty's Government are aware of the proportion of expenditure under multary and civil honds respectively. The multary expenditure has not hitherto been defrayed out of Imperial family, as in the Ottoman Empire each vilayet has to bear the charge of its own garrison. Any increase in the Customs would set free a certain, though not necessarily an equal, amount of Imperial funds. His Majorty's Government are numble, in view of the various financial accounties of the Ottoman Empire, to determine how such funds would be applied,

Mr. Lonch (Yorks, W. R., Ripon) asked whether the right honourable gentleman would stipulate for a reduction of the Turkish military expenditure now charged to the Macedonian Budget before giving the consent of this country to the proposed mentage in the Customs dates.

Sie K. Grey.-The question of what conditions should be made is still under consideration, and I can make no further statement on the subject.

0. In placing the above considerations before the Secretary of State, my Lords 4 : a start and a second contract of the second contract of the Kurein or Kathama at the present moment.

[1637]

N

This is a question of policy which involves much wider issues.

As, however, the subject is engaging the attention of the Government of India, Mr Morley may think it desirable that they should be in possession of the facts set forth above, which are material to a full consideration of the question.

I am, &c.

(Signed)

EVAN MACGREGOR.

#### Inclosure 3 in No. 16.

### Vice-Admiral Poe to Government of India.

(Confidential)

"Hermes," at Kurruchee, May 19, 1906.

I BAVE the honour to submit the following remarks on the inner harbour at Kurnin just to the south-west of Koweit, for the information of his Excellency the Viceroy and Governor-General in Council. I did not refer to this matter in my recent report on the Persian Gulf of the 26th uitimo, as I did not attach much importance to it; but, in view of the opinion expressed in paragraph 25 of Confidential Memorandum of information regarding external affairs in the Persian 6. If for the month of March last by the Captain of the R.I.M.S. "Investigator," " it is a state of the proper site for a ratiway station, should a ratiway ever come to Kewelt," I feel bound to represent that I do not concur in this opinion, for the reasons stated hereafter.

2. The deep-water anchorage off Kurein is shown in our old Admiralty chart, but the recent survey by the "Investigator" has increased our knowledge very greatly,

and has therefore drawn attention to if

3. With there is no doubt that at Karein there is a unrow stretch of deep water and goes are horage carrying an average desth of about 25 feet for a length of about 1 mile (2000 yards) and of about 31 to 32 feet for a further distance of 3 cables (600 yards), the width of the anchorage between the 3-fathom lines is nowhere more than 25 cables (505 yards), and is more generally only 2 cables (400 yards), and to enter this anchorage there is not more than 13 feet at low water, and that only it is very merow channel and 23 feet at high-water springs, and this channel is nearly a raile (4,800 yards, long.

i. Bearing these facts in mind, and that a railway from Bagdad to Kowett, or any other deep-water terminum in the Persian Gulf, would only be procurable as a commercial transaction of there was a varily menused amount of produce to be and, further, considering that, if this root increase of produce should become a fact, small steamers would be of no use to remove it, the whole tendency of the time being to run large vessels which are much more economical earge-curriers than small ones, I therefore think it very improbable that the Kurcin anchorage would be selected, entailing, as it would, very extensive dredging, the cost of which could not be tenated until exceful beings had been made, and the result being to open up a comparatively small area of water for large vessels.

5 Under these circumstances, and considering that there is a large area of deep water at Dulist Kathama with very easy approach at all times, and that this deep water is only I mile from the shere, I do not thank we need consider Kurzin as a probable site for the termin is of the rathany. No do shi it is very convenient to the win of Kowell, and the Strick would therefore probably favour it, and it is, of

6. The Kurein position is an excellent one for a beat harbour, and also for a vessel of war to acchor and support the defence of Koweli in an attack from the desert, as the "fersons" class could enter a little before high water, but even a or surry draught of water (28 ft. 6 in.) being too great, even at high-water approximately and the second state of the second second

No. 48.

Sie N. O'Coner to Sir Edward Grey - Received September 10.)

(No. 615. Confidential.)

Ric. Therapia, September 4, 1900 I HAVE received in the Confidential Print a copy of the Annual Report of the Bagdad Railway Company for the year 1905, which was forwarded in Mr. Whitehead's

letter to the Foreign Office of the 10th July.

In view of the fact that the railway is supposed to be a purely German undertaking, one eacoot, I think, help being struck by the number of French functions whose unines

II. Pisoned, who was formerly agent of the Creusot Works at Constantinople, and has recently been appeared Director General of the Ottoman Public Debt in the room of Count d'Armoux, has joined the Board. M Pisoned is very intenses with the French Embassy here, and his candidature for the rayant post of Director General of the Doht was very strongly supported by M Constans.

It will be noticed that not only are all the French representatives of French interests in the Public Debt Directors of the Bagdad Railway Company, but that the French financiars who are at the head of the Imperial Ottoman Bank at Constantinople and of the Paris Branch of the same institution are also without exception members of

the Board I venture to think it would be well to ascertain privately from the Imperial Ottoman Bank in London whether the inclusion of these names on the list of Directors may be construed as showing the existence of a private understanding between their

Syndicates and the Bagdad Radway Company.

Apart, however, from the partie as to what supresence should properly se attached to the number of Frenchmen on the Board, I think that Mr. Gwinner's recent

visit to Paris, which is reported not to have been attended with any definite result, may result in forcing the Germana to the conclusion that it is only by their own unaided efforts that they will be able to attain the object of their amb trops.

If this comes to pass, the declaration made to me in 1903 by Dr Gwinner (see my despatch No. 831 of the 15th December of that year), to the effect that, as far as the Anatolian Railway Company were concerned, there would be no objection to an arrangement by which the construction of the Persan Gu f and of the Bagdad Railway would be given to a British Syndicate would presumably no longer hold good, and the possibility of an eventual participation of Great Britain in the enterprise on such a basis, which was reverted to in the course of the private conversation which I had in July of last year with Dr Zander, and has never in principle been definitely descarded by the German group, would also disappear

I venture to think that it is most desirable that we should very carefully consider the consequences of allowing this phase of the negotiations to drop, and whether there is any other equally practical and advantageous solution of the question of participation.

from a British point of view,

I have, &c.

M. Niège to Jewish Colonization Association, Paris.

(Confidentielle.) Messieum,

Baydad, le 16 Juillet, 1906.

JEUS l'honneur de vous faire savoir, dans mes précédentes communications, que les environs immédiats d'Alep, dans un rayon limité, n'étaient pas d'une fertilité extraordinaire : qu'ils étaient, au contraire, pierreux et sees, et que ni la nature du sol, ni les rendements antérieurement obtenus, ni la végétation spontanée, ni les récoltes pendantes n'indiquament un sol riche et productif

Quoi que co fût un peu en dehors de vos intentions, j'ni tenu mus à use rendre comple des propriétés qui se trouvaient sur le bord de l'Euphraie, le la ... r la route

qui conduit d'Alep à Biréduk.

En quittant Alep en se trouve toujours en présence de terraine maigres, calcaires, caillouteux, à sous-sol pierreux blanchâtre. Ce sont des terres de qualité inférieure.

Depute Alop jusqu'à El-Bab (39 kilom.) il ne m'a par été donné de voir des terres

riches, fertiles

Autour d'El-Bab les terrains sont à peu près de même quaité que ceux qui correction Alep. Il faut s'éloigner d'El-Bab pour que la terre s'améhore peut à peut, pour qu'elle devienne plus fraiche, plus argileuse, pour qu'elle soit propre à la culture du blé à bons rendements et au semis du sorghe d été sans irrigation.

Mais les meilleures terres dans ces parages dépendent du Casa de Mambalj, qui

appartient presque tout entier à la Liste Civile.

Il a fallu complètement dévier à gauche et m'écarter tout à fait de la route pour jeurs rir de vastes domaines disposibles appartenant à un cariain Thomas Habib, richard Chretien d'Alep, sur lesquels il exerce son influence.

Ces villages sout les-

						- 1	Algorial mark

Les terres de ces villages ont l'avaninge d'être attenantes les unes à côté des autres de façon à former une série successive de propriétés qui se touchent, sous enclave, sons solution de continuité.

Dans tous ces parages on ne se rend pas exactement compte des surfaces; on ne connaît pas le dounours. On esteule l'étandue d'après la quantité de semence que le sol peut recevoir. Un choumboul est une menure de blé usité dans le vilayet d'Alej Elle pèse 80 okes, c'est à peu près à kités de Constantinople. Un choumboul de semence peut approximativement couvrir une surface de 4 donnoums, de sorte que l'étendue des terres situées dans les vibages précités serut de 112,000 dounoums.

Le surface est grande, mais malbenreusement les terres ne sent pas de bonne, nalifé. Elles sent pour la plupart entences, cuillenteuses ou sablemeuses, légeres,

fertilité moyenne, pouvant être rangées dans la entécorie de terres de trossème ordre. Elles ne peuvent pas être sommes aux irrigations, suif une petite surface

que cette surface doit être inondée pendant l'hiver et le printemps et ne pout être soumtse qu'aux cultures d'été; en affet, j'y ai rencontré une culture de chauvre. Sur tout le reste de la propriété, la terre est élevée et a'est pas susceptible d'être arroséu par l'Euphrate. On n'y fast que des cultures d'hiver (blé et orge) soumises aux influences des pluies. Les cultures d'été sans irrugation sont impossibles, à cause de la grande sécheresse et de la grande perméabilité du sol. Or, dans ces pays di nebement ensolvilés, il ur vout pas la peine d'entreprendre des cultures mitonnelles et

[16.

(1)

lucratives que si le sol peut être soumis aux irrigations et est apte aux riches semis d'été (dours, mals, sésame, coton, riz, cucurbitacées).

De sorte que toutes les terres que j'ai parcourues aux environs d'Alep (en dehors de Castoun), et depuis Alep jusqu'à l'Euphrate, ne conviennent pas pour une entreprise d'une œuvre de colonisation.

Des que nous traversons l'Euphrato à Birédjik (à 152 kilom, d'Alep) nous

toir de toute autorité, dans un pays soumis aux déprédations des tribus Arabes et aux incorrons des régiments irréguliers Hamidiés placés sous l'influence du Kurie Drahim Pacha.

Les environs de Birédjik sont caractérisés par des collines tou ; estenires, dén dées, incultes. Sur plus de quatre heures de marche au milie terrain à roche dure formant des pierres à bâtie, on ne rencontre pas de village ; rien que la solitade avec une ardente réverbération den terrains blances surchauffes par le coleil. Puis, tout d'un coup, l'hornron change d'aspect. Nous pénetrons dans la vallée de Sorondj, l'ameionne Bathon, célebre dejà dans l'antiquité

Nous marchions tout à l'houre dans un désert sans culture et sans population. Nous entrous tout d'un coup dans une contrée fertile, où les villages, anissant de terre, se multiplient tout d'un coup, comme par enchantement, taut il est vini qu'il suffit que le meilement oultival le, pour qu'inmediatement elle se l'hus de 370 villages se comptent dans la plaine de Soroudj. Ils sont serres contre les autres, et l'œi, à chaque portée d'horison, en compte dix à douse devant lui. Tous ces villages sont peuplés de Kurdes, sauf deux qui sont Armémens. Autrefois il y avant plus d'Arméniens dans cette plaine, mais pendant les événements.

nux persécutions.

Lette plane est formée d'un sol très fertile, argienn, de nature franche, très prefeno, mé augé de cauloux roules blanes et noirs, encacré par des montagnes cales res d'un côté et de roches basaltiques de l'autre. Des sources abondantes la parcourent et lus procurent l'esu nécessaire aux irrigations. Dans le sol l'esu reneantre à 3 ou à mètres de profondeur et elle ne tarit jamais au fond des punts, même à la fin des étés les paus clauds. On y fint des cultures d'hiver et des cultures d'été. C'est sei que j'ui rencoutré les plus belles cultures de chanvre que j'ui jamais vues de ma vie. On suit que cette dermère plante ne pousse bien et ne se dévoloppe abondamment que sur des terres éminemment fertiles.

J'ai demandé par curronté d'dans ces parages on pouvait trauver des terres à nequérir. On m'a répondu que cela est tout à fait impossible, que toute la plane de Borondy est entre les mans de quelques Chefs Kurdes très riches, qui ne consentiront mais à t'en dessaiser. Tous les Kurdes habitant la plane sont piscés sons l'autorité d'un Cheikh de tribu. Ibraham Pacha, qui commande aux Hamulés, a manye plusieurs fois de sonmettre sons sa dépendance tous ces riches villages, mais il n'y est pas encore parvenu. Il m été reponsé plusieurs fois. On dit qu'il prépare encore une ex ses et on pour cette année.

t. Até d'ajouter que toutes les cultures de la plane de Soroudj sont de toute tout de la plane de Boroudj sont de toute toute de la plane de l'orie du sorie du sorie du sorie de du sorie de de de l'orie de sorie de de de de de l'orie de sorie de de de de l'orie de sorie de de de de l'orie de sorie de de de l'orie de sorie de de de l'orie de sorie de la sorie de la sorie de la culture de la sorie de la sorie de la culture de la sorie d

De Soroud) à Ourplus il n'y a que 54 kilom.

Ourpha, l'Edesse du temps des Cropades, l'ancien Our-Casdim de la Bible, pays d'origine du Patriarche Abraham, est aussi situé au milieu d'une plaine très fertile, de nature negleuse, rouge brique. Toute la plaine jusqu'à Harran (sept beures de distance) et au-delà est de même nature, riche, acrosée par de nombreux petits cours d'eau, qui se réunissent et forment le Nabr-Bestich, qui se jette dans l'Euphrate, trois fléaux—les sauterelles, la muvagerie des habitants, et les razrias d'Ibraham l'a-ba

Deputs ringteeing and tee santerelles ee sont installees dans to pays et on ne part it part in the pays et on ne part it part in the pays et on ne part it part in the pays et on ne part it p

La région n'est pas très peuplée, mais les habitants qui s'y trouvent sont réputés

pour leurs meeurs belliqueuses. Tribu contre tribu, village contre village sont constamment en lutte.

Enfin, pour la compréhension de ce qui précède, il est nécessaire que je vous donne quelques explications sur Ibrahim Pacha. Ce dernier est un Kurde très quissant, chef des régiments Hamidés irréguliers. Il est le roi de la contrée de la Inute Mesopotamie, dans la region qui s'étend à la limite du Kurdistan au nord et de et l'Emphrate dépendant des Vilayets d'Alep, de Diarbekir, et de Mossoul. Son quartier-géneral est à Viran-Chélur. Les regiments Hamadés sont fourres de Kurdes et d'Arabes bandits, pillards, assassins, gens saus aveu, sans foi ni lois, qui obéissent avengiément aux ordres de leur chef. Ils ne vivent que de vol et de rapine. Ils demourent sous lears tentes of se rendent my premier appel auprès d'Ibrat im l'acha, mentés sur leurs coursiers. Celia-ci les envoie dans telle on telle centrée pour faire des ruzzios, voler des suimaux. Tous les villages qui ne veulent pas être sous la dependance nont source no pil age, c'est anna que, petit à petit, les villages se placent sous as successacte. Alors o'est hu qui ramasse tous les impôts-vergho, dime-yol paro sa, empôt sur les animante-et remet au Trésor l'ublie ce qui lin plait de donner, edeat pour lui la plus grande partie. Les revenus de l'État dun quent de jour en four La force régulière armée recule devant les bandes tragulières . l'influence des autorités de Constantinople est annahitée par celle du chef des Humidés. Les gros propriétaires qui n'out pas voulu se soumettre out vu tous leurs domnines pillés, mynges, saccagés, meendies, jusqu'aux pertes même de Darbékir. Ils ont en beau protester, se rendre même à Constantinople pour réclamer, mais ils n'ont jamais pu obteur gain de cause.

lientem l'acha avait été dans le temps chaud pour répandre la terreur dans in contrée et massacrer les Armémens qui vouluent faire une révolution. Après avoir réduit à neant toutes les compagnes Armémenues, il tourne maintenant ses explores contre les Massimus eux mémos d'availle les du cert !

contre les Musulmans eux mêmes. Cruelle fronte du sort!

M. Daoud Dayan, un Notable Israelite d'Ourgha, m'a fact de très belles propoations pour l'achat de très vastes étendues de terrains très fertiles dans cette région. Mais après la constatation de l'état d'insécurité du pays, telle que je viens de rous le relater, il est naturel que je se devais pas preter l'oreille a de parelles offres.

J'ai du vous indiquer tout mon travail dans le Vilayet d'Alep avant de vous

introduire dans celui de Diarbekir

## Inclosure 1 in No. 51

Acting Consul-General Running to Sir N. O'Conner.

(No. 74. Confidential

Bagdad, August 25, 1908.

I HAVE the honour to offer, for your Excellency a information, a few remarks on the local influence that is likely to be acquired by the Power which ma . . . . . a railway in this exceedingly unsettled portion of the Sultan's dominions. of Irak rony be split up and hostife to each other, but many of them are a street enough to keep the avaisee of the Turkish officials within bounds, and the tribal system is a living organization which cannot be agnored.

2. It is not my intention to attempt to deal with the international problems which have been mised by the proposal to construct the Hagdad Railway; this is a task for which I am in no way competent. At the same time it may perhaps be of interest to your Excellency to have a concernat detailed forecast, written by a man who has for some years been in charge of a will district on the Indian frontier in which a radway a transfer and the second

1 of the Power making the railway will and must extend to the tribes through ignate it passes.

The Arch takes, at any rate between Busserah and Bagdad, have by no means fully accepted Turk in rule, which they hate, and the Arab Shockles are quite I we make to see that a Turkish radway will weaken their own postnon, consequently it may fairly be assumed that they either have to be correct or enjoyed into referriding from active resistance. Thus, before even a detailed survey one be meteral negotiation will have to be earned on with the tribes through whe so limits the line passes. The Arabs will not trust to Turkish promises, and the

Lower most interested will meetin by be concerned with the negotiations, and will have, other directly or indirectly, to guarantee the good faith of the Turnish officials. aid of a foreign Fower, the Turks could only make the railway under

Burning construction large bodies of labourers would have to be employed. fereign officials would be brought in close touch with the local labourers and ti-labouring population of the district, through disputes and crimes in

which the latter were concerned, . Supposing the ranway to be completed, there are a number of questions which are pertain to arise, and which will bring the railway officials in close touch with the people of the country. I will give a few examples of what I mean. Without the Laglantes and the Three Mesopotamus could never be snything but a desert, at the same time these rivers will offer formalable dangers to radway engineers. It is

I . . s that the radway engineers would require to control the river where it approached bridges, but it seems to me that they might claim the right to much more extended interference. The tracing which I inclose shows how the River Tigns above Kut-el-Amarah appears to have altered its course in recent years, according to the best maps available. It is a well-known fact that the Eupbrates has forsaken its old bed altogether from a point near Museyib, and that what is now the Euphrates below that point was orginally a small - S - se facts before them, the managers of a great railway would be to superintend the banks of the rivers, and to have a voice in granting or relating permission even for canala made according to Arab methods. Thus the foreigners would play a very important part in controlling the source of nearly all woulth in the country, and they would get unrevaled opportunders for preparing irrigation schemes of their own. There are many in nor questions, loo, concerning water that would bring the radway officials in close touch with the owner natural course, but this might not suit the radicay officials. Disputes would certainly rise about waterways under the railway. As the railway brings prosperity and provides a market for agricultural produce the area under cultivation will spread, and this will mean a demand for increased facilities for passing irrigation water under the line. Building materials for railway bridges and culverts will be expensive, and foundations will have to be deep. Consequently a Sheikh who may want to improve his canal will find it worth his while to keep on good terms with the railway officials.

river water is used, and there appears to be no other available, the milway officials must either be the owners of long channels under their own control, or they must become sharers with the tribeamen in channels common to both. In either case there will constantly be disputes about division of water, theft of water, or cost of cleaning and guarding the channels.

6. Putting ando questions immediately concerning the land and water, there are a number of other matters which will bring the railway officials into daily contact

with the people.

The line will have to be guarded along its whole length, and guards will laye to be provided at small stations. It is of course conceivable that this work night be done by Turkish soldiers, but it will probably be found much cheaper and more effective to employ men supplied by the local Sherkin. This would at once bring the local Sherkin and ranway officials into close relations. The line will also be maintained by ganginen, who must be recruited from local inbour,

At first, at any rate, people will be damaged by trains, and entile troopsions on the line will be run over. Here again disputes will arms between the ranway officians

I . . . . . . . . . . . ys in which the milway officials must become closely connected with local posters and interests. The railway will be the one unrivalled route to the shrines of Nedjef and Karbala, which are the centre of the Shigh religious world, and it will also bring a large number of Sunia pilgrims to the shrine of Sherkh Abdul Kadir at Bagdad. This must tend to increase the influence of the inition managing the endwar

The railway officials will certainly turn their attention to obtaining some local fuel, whether they find cost or petroleum, or have forests, so is customary along the beaks of the Indus, their influence, or rather that of the Power under whose protection they work, will increase in proportion to their local expenses, which must in any

case amount to a very large figure.

. There are several other local peculiarities, probably not thought of in England, which will bring the railway officials into contact with the local tribesmen. As an mataneo of one, I may mention the recent attack on the British stemmer " Khahfah," . total tribal to a superior years desire to harm the British Government or British officials ar subjects, the sole object of the Araba was to force attention to their case (which they did with great success). and the railway would afford as good a means for political measures of this sort as dis, the "Khalifah," The Power managing the railway would certainly make its influence at the tray was to kell and the railway would be railway would be railway would be railway and the railway would be railway to be considered is the blood fend, and this will continue to axist for many years to come if the experience of the Indian Government on the north-western frontier of

India affords any sound basis for a conclusion. A life for a life is the law of the blood fend. Even if the European officials of the railway avoid liability to this law, which, according to local opinion, is very doubtful, there would be difficulty in obtaining any large number of labourers who were free from its penaltim and obligations. Isolated railway employes would fall easy victims, and the railway officials would be forced to interfere for the protection of their servants.

9. So far I have only attempted to show how the railway officials would be forced to spread their influence among the people of the soil. It may perhaps be interesting in the causes that would oblige them to increase their influence with the local

Turkish officials and with the population of the towns,

10. The attitude of the Tarkish Government towards the British Representative at Bagdad is one of the utmost suspicion. Scarcely any Turkish subject would dare to be seen inside the Residency, and certainly no conspicuous Arab or unbitary officer. It is a crownistances, it is difficult for the British Government's Representative to a close and drat-hand knowledge of what is going on in the country, and it is but to impossible for him to have any personal influence which might be used in an emergency. With the Power owning the railway this kind of boycott would be impossible, and consequently to at Power would have at its disposal a very considerable force of personal influence, which is a most valuable asset in the East in time of trouble as well as in time of peace.

Not only would the radway officials have unrivalled sources of information, they would also be in duly contact with the Turkish officials, who would have the decision of the hundred and one little disputes and difficulties that arise in connection with any

large business undertaking.

Traders and shopkespers would be likely to follow their national railway, and they would find it suited them to be scalous supporters of their nation and its trade,

Hospitals and schools would also probably be opened.

It trust that I may be excused for intruding my opinion on a subject which has been fully discussed by some of the ablent men in Europe. My excuse must be the possibility that it has not been examined from the point of view of a man who has spent some years in directly administering a district populated by innational Makeumachan tribes. My experience lands me to think that the Power which makes and manages the Bagdad Railway will, where it runs through the unsettled country of Mesopotamia, inevitably obtain a communiting influence both with the Turks and the tribeamen. If it suits the Power concerned to become the defacts ruler of the country, I can see nothing to prevent it from attaining that position.

12. As the value of my arguments entirely depends upon the accuracy of my statement that there is no properly-established Government able to keep the tribes in order, and that the tribes must therefore be treated as having effective pointeral a wor, I inclose a Memorandum, which is not perhaps complete, showing the local distributions that has been described as a large statement of the control of the local distributions that has been described as the local distributions that he would be a local distribution of the local distribution of

Memorandum.

July 17, 1000 - A letter oper rifes a maker a testate to left Bagini for Mentals to punish certain Person tribes who had cut off an irrigation canal and diverted its water to the detriment of the Arab tribes there.

September 6, 1900.—300 infantry, 20 artillery, and 1 mountain gun sent to Mendali for the same purpose; 300 cavalry reported to have also left Khanakin for Menon The Property of about 200 mules laden with to Kerkuk by certain Kurdish tribes. That of killed, and that the robbers got off to Person territory with 40 mules laden with the most valuable of the goods.

thought 1, 1902.—Embissy informed of disturbances among the Arab tribes in the neighbourhood of Kerbala. The authorities were, however, able to suppress it with the troops on the spot. Colonel Newmarch did not think the incident of much consequence, except as showing the unruly and inflammable character of the Araba in

these parts.

October 16, 1902.—Embassy informed of a fight between the Anexa and Shammar Arabs near Kerlain, and that a detachment of cavalry consisting of 140 sabres were despatched from Italiah to quell it

November 5, 1903.—Bussorah Consul reports a disturbance at Nasariyah in which

stance blors were killed and six officers.

He also reports fighting at Amarah between the tribes of Seyhud, Azerij, and Solaga regarding some rice-fields. The troops fired on the Arabs. Official reports state that some 180 men on the side of the Arabs were killed. Private reports estimate 500 persons, inclusive of men, women, and children.

November 21, 1903. -Russorah Convul reports an attempt by Sadun Pasha, of the Montafik tribe, to cross into the Jeneals, and the opposition of the tribes reading.

The local tribes appealed to the Government, who sent the Kol Aglussi with a fifty soldiers and gendarmen to try and settle matters. It ended, however, in

troops, including the Kol Aghassi, being massacred.

December 17, 1903.—In connection with the above incident the Bassorsh Consultreports the arrival at Zuborr of Muhammad Pasha Daghastani with 1,200 men. He also reported that, provious to the arrival of the troops, a party of the Muntalk had twided a village on the outskirts of Bussorsh and carried off cattle and carried. The in Bussorsh, and shops and houses were closed

Hoodad, le & Acett, 1906 Memneuts. PAR les communications que jui faites à l'Alliance Israélite sur les communantés. Intradictor de Kurdostan et dont vous avez sans doute pris commandance, et par les quelques reme guements que je vous ai dennés par me lettre du 16 Juillet, vous voque aton fatt une alor de l'état tromble où se trouve la région comprise dans la Haute Mosopotamie, dans la partie du Kurdistan comprisa dans les Vilayets d'Alep, de scounts relative que pour ceux qui portent un chapeau, qui sont sujeta etrangera et qui, 3' me rendrot d'trurphe à Diarbekte, plusieurs vilogeois vennunt me a cours de route, la faveur de maccompagner, pour se rendre à telle ou telle locanté, parce que las habitants de cette localité sont las ennema de ceux de leur village. "Hi nous sommes avec too, our es un étranger," donnent de, " on ne nous inquis-J'étaus souvent obligé de posser la muit sous les tentre des Kurdes. Pour me fore nombre de médicamenta nua hommes et aux femmes de la tribu 1 arboré deux drapeaux. A la faveur du drapeau Français, passiours keloks sont vent- a The second secon

de Diarbékir est veuu me prier de prendre dans mon kétek quesques laflots d' rente dises de valeur, parce que j'avais à mon service un drapeau étranger et saptiés. Il n'aurait potre tribut en passant devant certains villages de Kordes. Ces brigands ont fait arrêter les kéteks et ont déclaré qu'à cause du drapeau ils ne toucherant par marchandises, mais qu'ils entendaient recevoir 1 medjidie de chaque voyageur un dut s'exécuter. De ma part, on se contenta seulement d'un peu de tabac et de quel-

Dans un kétek parts quelques jours avant moi, avaient pris place des employés du tres.

Chapeau. Les prisards le prirent pour un Européen, ils le prièrent d'indiquer les objets qui lui appartenment, auxquels de ne touchèrent pas, et enlevèrent tous les effets des employés du Gouvernement.

Pour ma part, pétais bien recommandé aux soldats qui m'accompagnaient; ils nome lassauent jamais seul. Dès que le kélek s'arrêtant et que je mettais les preds sur la rive, je les voyass venir derrière mei, avec les funts armés sur l'épaule.

In voyageur Allemand qui parcourait la paya arborait le drapeau non seulement aur le kélek, mais même aur la voiture, à obte du cocher, quand il se rendait d'ine ville dans une autre.

Comment étudier dans ces conditions une contrée au point de vue agricole, quand il est dangereux de la traverser? Comment es prometter dans les campagnes et interroger les payeurs quand en risque en vie l' Comment examiner ce qui se passe dans la rue quand on tre peut pas mottre le nez à la fenêtre !

Tous les renergements que j'ai pris sur le Kurdistan ne constituent que des complet état de trouble, qu'en n'y trouve aucune accumé, ammne organisation administrative, et que pour longtemps en ne peut songer à y entreprendre la mondre œuvre de colonnation.

Quand je me trouvant à Discibbir, j'ut cherché à faire la commissance de l'Impecteur d'Agriculture, et j'ut voulu avoir de lui quolques remeignements agricules sur la région. Il me rit au nes, m'avouant qu'il n'avait pas de réponse aux questions que je lui possus, que des étules telles que je voulum les faire ne pouvaient être entreprises que doos un jaya organisé, et non en pleme ausrelie : que, pour se part, il se cot tentait de toucher les appendientements quand on les lui payant ; qu'il n avait jamais quitté la ville, et qu'il me canait jum à rimper se peut pour aller se promener dans les emplagnes, au montre populations Kurdes

Et capendant la région est buile, riche, et fortile

Après avoir quitté Ourplis, la route remonte vors le nord pour se rendre à Discheur par Kars-Kupru, Kars-Djoroun, Kars-Ko-youn, et Sévicek, pour attendre Discheur, qui s'appelle aussi Kars-Ainid.

Les terrains sont d'abord argilo-calcaires, caillouteux, groatres, de fort bonne qualits. On y oultire le blé, l'orge, les lontilles, les pols-chiches, les vesces, les pastèques, et le sorgies. Le mais, le séamme, et toute autre culture indugène y sont incomme. Les rendements du blé varient entre cinq et quinze fois la somence.

Mass au fur et à mesure qu'en s'approche de Darbekur, la nature du sel change. Les cailoux notre, percua, prement la place de perren blanches; le sel devient de plus en plus rouge braque. Nous nommes en processe d'un sel basiltique formé de la décomposition du sérulet et du pyroxène. Tous les villages que l'en reneautre ent un sapect sombre, ils sont tous bâtes avec des pierres noires d'origine quisée, de même que toute la ville de Durbékur. Toute la plaine qui s'étend autour de cette ville est d'une richesse remarquable, mans, malbourensement, tout n'est pas culturé, la population est clausemée, et là où le mal ne porte pus de culture il se couvre d'une végétation naturelle très luxurante.

Toute la region, à cause de la formation gradogique, a un aspect noientre. Vous

de "Kara", "kara" veut dure, en Ture, "noir '

La rigion ne manque pas d'esu. Outre la Tigre, il y a de nombreuses sources à fleur de terre, comme cela se rencentre dans les pays basaliques, qui peuvent servir à l'irrigation des cultures. Les paysans s'en servent principalement pour la production du

[1687]

[35272]

No. 53.

tie. Cette céréale, cultivée en petite quantité, est d'une qualité supérieure. On en exporte un certain nombre d'hectolitres. Quant sux autres céréales, blé et orge, la culture ne s'étend pas, parcs que l'exportation est difficile. Il n'y a presque pas de routes currossables en bon état dans le vilavet. Le transport des marchandises ce fait au moyenne de bêtes de somme. Les ports d'embarquement sont Sameoun, sur la Mor Noire (à 585 kilom, de distance), et Alexandrette, sur la Méditerrance (à 550 kilom, de distance). Les frais de transport reviennent à plus de 28 fr. les 100 kilon, de Diarbélor au premier port, et à près de 20 fr. juaqu'au second. On conçoit facilement que le transport de céréales est difficile dans ces conditions, que la culture ne s'étend pas au delà des besoins de la population locale, et que s'il y a un surplus dans la production il est conservé dans des silos, sous terre, comme une réserve pour les mauvaisses aumées. Même remarque peut être faite pour la culture des vesces, des pois-chiches, et des leistifies, destinés uniquement à la consommation locale.

La soule branche agricole qui ait fait quelques progrès dans la région est la culture du mérier et la sérioloulture, grace aux sous de l'Administration de la Dette Publique. L'industrie du tissage et de la broderie de soie est bien répandue à Diarbékir. Les tissus de soie et les broderies en or, en argent ou en soie de différentes couleurs, remarquables par le fini de l'exécution, sont envoyés en Angleterre, en Allemagne et en

France.

Je ne dois pas omettre de vous citer la remarquable culture de pastèques des cuvirons de Diarbékir. Ces encurtetacdes atteignent une grosseur démesurée et arrivent à péner jusqu'à éo à 50 kilog, pièce. La culture se tait sur les bords du Tigre, après que les eaux se sont retirées. Un ne laboure pas le sol. On se contente de faire des trous sur le limon frais abandonné par le fleuve et en sème les graines dans ces trous. Les racines s'allongent dans un sous-sol constamment frais et humède, et les fruits

prennent un développement extraordinaire.

L'organisation des tribus dans le Kurdistan et le régime de la propriété rappellent absolument le régime féedal du Moyen-Age. Tous les paysans obsissent, groupés par tribus, à un Chef, à un Seigneur (Bey ou Agha). Presque toutes les teures appartiement à ces Beys. Le paysan, dans la grande majorité des eau, ne possède absolument rien. Dans plusieurs parties de la régime le Gouvernement n'a pas encore pu Installer un tabour, un cadastre. Les impôts fonciers sent fixés à l'acuiable entre le Gouvernement et les Aghas. Ce sont ces dorniers seuls qui s'entendent avec les autorités pour la perception de tous les impôts. Les Aghas ne remettent au Gouvernement qu'une très faible partie de ce qu'ils encaissent des paysans.

De D'arbeair à Messoni et à Bagdad, jo suis parti en "kélek" sur le Tigro. Jusqu'à Djézirch, le seuve coule entre des cellines encaissées. Au début, la rive droite paratt plus pierreuse, plus milleuteuse, plus élevée que la rive gauche, qui est plus plate, plus limeteuse, plus abundante en caux. En général, on peut dire que depuis Diarbékir jusqu'à Bagdad, la rive gauche paratt plus fertile, plus peuplée, plus cultivée que la rive

droite. Presque tous les affluents du Tigre lui arrivent de la rive gauche.

Puis, les collines s'élèvent à la même hauseur des deux côtés du fleuve. Le Tigre alors passe sotre des montagnes de même nature, de même construction, avec une strutification au même niveau. On dirait qu'une faille s'est produite su milieu de cette chaîne de collines pour laisser couler l'eau. Le, le fleuve n'apparait pas comme une tigne de démarcation entre deux régions différentes. C'est plutôt un trait d'union. Les collines vent ensuite en diminuant de hauteur jusqu'à ce qu'elles s'éteignent et mourent complètement en arrivant à l'étaireb. A partir de cette ville, c'est le plaine qui commence, la plaine à perte de vue des deux côtés du fleuve, la plaine monotone jusqu'aux coufins de l'horison.

La partie du Kurdistan qui dépend du Vilayet de Mossoul et qui s'étend depuis le Tigre jusqu'aux fesotières de la Ferse, quoique riche et fertile, est encore une des régions de la Turquie la moins sûre, la moins organisée. Je voulnis la visiter et me suis rendu jusqu'à Souleimanieh, mais toutes les personnes au courant de mon projet m'ent

almohument diamade et empéché d'antraprondre cu voyage dangeroux.

Dans cos conditions, il était impossible d'entreprendre des études agricoles dans les vilayets de Districhir et de Mossoul. Je me suis burné à étudier du mieux que j'ai pu la aituation des communautés Israélites, et je me suis rendu à Bagulad après avoir achevé ce travail.

Venilles, &c. (Signé) J. NIEGE.

Memorandum communicated to M. Cambon, October 24, 1906.

HIS Majesty's Government are advised that a difficulty has arisen in regard to the arrangement, demanded by the Powers as one of the combitions for their assent to the increase in the Turkish customs duties, by which the Council of the Ottoman Debt was to guarantee the deficit in any one year in the Macedonian Budget up to £ T. 250,000.

It appears that the German Delegate has expressed his strong disinclimation to give any assurance to this effect until a question of outstanding advances, which are secured on the surplus revenues of the Debt Administration, has been settled.

The surplus for the current year is understood to be approximately £ T. 600,000. The fixed annual charges to be met from this source amount to £ T. 250,000, leaving a bilinee of £ T. 350,000. Against this, however, the Turkish Government have borrowed, in short loans, summ which in the aggregate reach £ T. 750,000, so that, under existing arrangements, there remains no surplus for at least two years from which the £ T. 250,000 can be drawn, if required, for Macedonia,

The British Delegate therefore proposes, and his French colleague, it is understood, concurs, that the date for the repsyment of the abort loans should be postponed, and that for the service of their interest and redemption there should be used only a part of the balance of £ T. 350,000 remaining after the fixed annual charges have been met. If £ T. 100,000 were used for this purpose, it would have £ T. 250,000 for the guarantees

for Macedonia,

This proposal is unfortunately opposed by the German Delegate, who, for reasons said to be unconnected with this question, wishes to meet the difficulty by placing other Turkish revenues under the control of the Council of the Delt. He suggests that the short longs should be cleared off by a loss o longue reteries, on the county of the Government's resumes from mine and frees, and that the requires capital should be provided from the reserve fund of the Council of the Debt.

The British Delegate does not consider this proposal financially sound; he does not expect the Government will consent to assign the revenues in question; and he is of opinion that his colleagues, and especially the Austrian, will not agree to make so unusually large and unprecedented an advance from the reserve fund of the Delta Finally, he would not himself be able to agree to the proposal without the previous consent of the British Syndicates, which, in his view, they would be amply justified in withholding.

It is hoped that the Ottoman Bank, which is the principal creditor of the Turkish Government in the matter of the short loans to which reference has been made, will recognize the advantages of the course proposed by the British Delegate, and if further difficulties occur His Majesty's Government trust that the French Delegate will be able to support his British colleague.

Foreign Office, October 24, 1906.

No. 54.

(No. 288.) Sir A. Nicolson to Sir Edward Grey .- (Received November 3.)

(Telegraphic.) P. St. Petershaph, Necessier 3, 1906.

MINISTER for Foreign Affairs informed me to-day that he had gathered a general impression at Berlin that Germany could had the funds by herself to carry the Bagdad Railway line over the Taurus, but he doubted its further prolongation being possible without other assistance. He is in agreement that the line should be international, at any rate in regard to the last sections, and that Russia should discuss with us arrangement for our joint participation.

[37154]

No. 55.

Sir F. Laucelles to Sir Edward Grey .- (Received November 5.)

(No. 333. Very Confidential.)

Berlin, October 29, 1906.

M. ISVOLSKY, who is spending a few days in Berlin on his return to St. Petersburgh from Paris, and whose acquaintance I had the bonour of making at a party at the Russian Embassy last night, was good enough to call upon me late this afternoon, as he wished to have some conversation with me. He said he was glad to think that a decided improvement had taken place in the relations between our two countries, and he was in hopes that a thorough and complete understanding might eventually be come to. For this, however, much time and patience would be required. Eurnestly desiring, as he did, to arrive at such an understanding, it was necessary for him to take into account public opinion in Russia, which was still very suspicious of any rapprochement between England and Russia. Any attempt, therefore, to harry on an agreement would probably give rice to difficulties and result in failure.

I observed that when his Excellency spoke of "public opinion" he referred not only to what was understood by the term in other countries, but also to the opinion of highly placed personages in Russia, not excluding perhaps some of his Excellency's colleagues. He did not dear that this was so, and went on to say that he had been struck by the admirable manner in which the English deputation which had proposed to visit Russia had been dissuaded from earrying out their intention. The visit would certainly have been inopportune, and would have caused embarrament to the Government. Proposale had, indeed, been made to prevent the deputation from going either to St. Patersburgh or Moscow. He had strongly opposed these proposals, and had insisted that no courcive measures should be taken against the deputation. He attributed the abandonment of the risit to the good sense of the newspaper correspondents and the British Colony, and perhaps more especially to the presence of Sir Donald Mackensie Waliace in St. Petersburgh, who had been able to give good advice. His Excellency also spoke in terms of the warmest praise of Sir Arthur Nicolson, who on this and indeed on every operation had acted admirably. Although he had been but a comparatively short time in Russia, he had obtained a clear insight into the internal situation, which it was very difficult for any foreigner to understand. He was, indeed, the right man in the right place, and his clear and sound judgment would be of the greatest utility in carrying on the complicated negotiations which M. Isvolsky stoccrely trusted would result in a satisfactory understanding.

On my saying that a beginning had been made by the two Governments agreeing to a joint advance to Persia, M. lavolsky said that that was a step in the right direction. He greatly regretted the incident of the Sciatan Telegraph, of which he was in complete ignorance when Sir Arthur Nicolson brought it to his notice. He had given orders that the stome que was to be maintained, and be had therefore been annoyed at hearing of the moident which had now been explained to be a matter of technical detail. I told M. Isrolsky that my previous knowledge of Persia made me appreciate the difficulties of the situation. The Persians were very suspicious, and could not understand why England and Russia should wish to come to terms, and feared that any arrangement between the two Great Powers could only be brought about at the expense of Persia. It would also be necessary to overcome the rivalry which was almost truditional between the agents of the two Governments. I knew from personal experience that it was perfectly possible for the British and Russian Ministers to remain on friendly terms, and I booked back with pleasure to my friendly intercourse with M. Butzow when we were colleagues at Tehran. M. Isvolsky said that the appointment of Sir Cecil Spring-Rice as British Minister at Tehran had given him the liveliest satisfaction. Sir Cecil was well acquainted both with Russia and Persia. He was on good terms with his Russian colleague. He would understand how necessary it was for Russia not merely to protect ber enormous commercial interests in Persia, but also to maintain her secular traditions. There could be no doubt of the sincerity of his desire for a good understanding between England and Russia, and his knowledge and experience would be of great assistance in bringing it. about. The accounts of the state of the Shah's health were most ununtisfactory, but M. Isvolsky did not anticipate any complications on His Majesty's death, and he believed that the Valiand, being supported both by England and Russia, would succeed his father pescefully.

M. Isvolsky referred to his recent visit to Paris. On his arrival there he had called on M. Bourgeois, who had just ceased to be Minister. The fact of his arriving during the Ministerial crisis had, however, had the advantage of enabling him to have a longer conversation with the President than perhaps would otherwise have been the case. M. Palkières had stated that he had made it a condition of intrusting M. Clemenomu with the formation of the Ministry, that there should be no change in the foreign policy of France. No doubt apprehensions had been felt in certain quarters at the fact of M. Clemenceau having become Printe Minister, but M. Isvolsky was convinced that he would pursue a prudent and peaceful policy with regard to foreign affairs, and would devote himself more especially to internal questions. He would certainly put in force the law with regard to the Church, but he had announced that he intended to do so without having recourse to force. M. Clemenceau was now at the head of a homogeneous Ministry, but it was doubtful how far this increased his power. The Ministers whom he had selected did not command many votes in the Chamber, and M. Isvolsky had gathered that the general impression in Paris was that his Ministry would not be of long duration, as the other groups in the

Chamber would before long combine against him. Since he had been in Berlin, M. Isvolsky had been received by the Emperor, and had had a long conversation with Prince Bolow, with whom he was going to dine to-night. He need not tell me how extraordinarily sensitive the Germans were with regard to any arrangement which might be some to between any two countries without their having been consulted. He was therefore not surprised at being told, shortly after his appointment so Minister for Foreign Affairs, by the German Ambassador in St. Petersburgh, that the German Government, while halling with satisfaction any arrangement between England and Russia which would contribute towards the maintenance of the prace of the world, expected to be consulted with regard to any points in such an Agreement which might affect German interests. He had replied that the understanding which might eventually be arrived at between England and Russia merely aimed at removing the causes of friction which were due to their respective interests in the East. It certainly would not be directed against any other country, and he asked what were the German interests to which the Amimandor had alluded. The answer had been, as he had expected, the Bagdad. Railway. He had expressed the opinion that the Bagdad Railway should be conaidered as a German undertaking, and that Germany should certainly be consulted in my question connected with it. As Germany was assking for the participation of Buglish, French, and Russian capital in this undertaking, he was strongly of opinion that any negotiations on the subject should be conducted by the four Powers. conjointly, and not separately. During his recent visit to Paris, he had again expressed this opinion, in which the French Government concurred, and he had repeated it in his convertation with Prince Bulow, whom, he believed, he had convinced that an understanding between England and Russia would not in any way be directed against Germany. It would, he said, be ridiculous to suppose that Russia, considering her geographical position, and the internal condition of the

country, could deliberately seek a quarrel with Germany.

There was one question which M. Isvolsky considered should at once engage the attention of the Great Powers, and that was, the reform of the Judiciary in Macedonia. He had not yet heard whether the Sultan had agreed to the conditions contained in the last note presented by the Ambassadors at Constantinople on the subject of the increase of the customs duties. He had, however, little doubt that he would do so, and that sufficient money would then be found to defray the expenses of the Administration. He considered it essential that the judicial reform should then be undertaken, and he believed that if this were done, the Civil Agents and the Financial Commission would be able to effect a real improvement in the condition of the country. He did not anticipate any immediate complications in the Balkana, such as would undoubtedly have broken out if the Powers had permitted the annexation of Crete by Greece. The Bulgarians would in that case certainly have demanded some territorial compensation, and would have resorted to force had it been denied them. I said that it appeared to me that this demand of the Bulgarians was unreasonable, as none of the other Balkan States had received compensation when Eastern Roumelia was united to Bulgaria. M. Isvolsky united, and said that this took place so long ago that people had forgotten all about it. I asked whether he thought that there would be danger of complications arising in the event of the death of the Sulian. He replied that he did not see any reason for alarm, and he thought that the Sultan's successor would be allowed to take peaceful possession of the Throne. He had been glad to hear that the Sultan had recovered his health, and that his illness had not been so severe as had been generally supposed. In his opinion, a more serious situation would be created if the Emperor of Austria were to disappear from the scene. As long as His Majesty lived, it was not probable that there would be any serious trouble in his dominious, and the demand of the Hungarians for separation from Austria would not probably take effect during His Majesty's lifetime, which it was cornestly to be hoped might be prolonged for many years.

On my observing that I had been glad to see that there had been some improve ment in the internal condition of Russia, M. Isvolsky said that this certainly was the case, and was due to the wise action of M. Stolypin, who was admirably fitted to conduct the internal affairs at this difficult moment. He was a man of great strength of

character and very calm.

The terrible calamity which had befullen his family had raised him in the general estimation, as, even on the night of the catastrophe itself, he devoted himself to his work as usual. He never finehed, and although he would resolutely maintain order, he was a "progressive" man.

On taking leave of me, M. lavolsky again expressed his great extinfaction that Sir Arthur Nicolson was now His Majesty's Ambassador at St. Petersburgh, and his sincere hope that the negotiations in which they were engaged would lead to a complete understanding between England and Russia.

I will take the opportunity of the messenger who will leave Berlin on the evening of the lat proxime for St. Petersburgh and Tehran to send a copy of this

despatch to Sir Arthur Nicolson and Sir Cocil Spring-Rice.

Mr. G. Barelay to Sir Edward Grey .- (Received November 6.)

(No. 737.)

Constantinople, November 9, 1906.

I HAVE the honour to forward an extract from the "Levant Herald," according to which the work in connection with the extension of the Bagdad Railway to Adams is to be begun next March.

I have, &c. (Signed) G. BARCLAY.

Inclosure in No. 57.

Extract from the " Lecont Herald" of October 31, 1906.

LA Direction du Chemin de Fer d'Anatolie dont le prolongement constituers la ligne de Bagdad, se préceupe de la construction d'un nouveau tronçon aliant de Boulgourlos à Adams; l'entreprise en sera de nouveau confiée à la maison Oltzmann de Francfort. Une vientaine d'inginieurs travallent à Francfort jour et nuit pour mettre au point les tracés et les plans des travaux d'art. Les travaux commenceront au mois de Mars.

Le Directeur des Travaux, M. Ritter, est déjà arrivé en notre ville. Deux ingénieurs Allemands sont partis de Hatter Pacha pour étudier la transformation de la rade de Mersine en port d'aboutissement, ou la création d'un port à Youmourtalik, à coté de Mersine. La Compagnie Allemande aurait réalisé les fonds pour cette construction. Ces fonds auraient été fournis par un Syndicat Français dont on fait la constitution et un groupe de capitalistes Angleis.

(Na. 190) (Telegraphia.) P.

St. Petersburgh, November 7, 1906.

YOUR telegram No. 437 of the 5th instant.

Minister for Foreign Affairs, in reply to my impury as to manner and form of Russia's participation in the Bagdad Hadway, said that he would have to consult with his colleagues and obtain the consent of the Cabinet to participation before being able to give me a definite opinion, and asked if I had any proposals to make. I said that though I had no specific proposals. I imagined we would follow the line suggested in 1962 during the negotiation between the German and British financiers, namely, an equal number of representatives on the Administration and an equal division of shares.

I inquired of him the opinion in Paris towards the participation. He and M. Bourgeois' view was that all four Powers should negotiate in common. He added that France had, he understood, been holding back till the Russian Government should agree. I replied that we had been in the same position, but that it was time now to

seriously consider the question.

He asked if he might have a Memorandum on the proposals made during the Anglo-German negotiations of 1902, not in the form of proposals made by us, but merely for his own guidance and information. I said I would suggest the matter to you. May I have such a Memorandum?

(No. 621.)

Fureign Office, November 8, 1900.

I TOLD M. Cambon to-day that M. Isvolsky was favoumble to Russian participation in the Bagdad Railway, and was consulting with his consenses, in order to get their consent. He had asked us to give him a Memorandum on our views as to participation.

M. Cambon was strongly of opinion that we should want for overtages from

Germany.

I aid that it would be desirable that the French Government should let the Russian Government know that that was their opinion. I proposed to say so to the Russian Government, but I thought I must also say something a little more positive to them. I would tell them that the Bagdad Railway did not concern us at its present stage, but if it was to be developed into a through line leading to the Persian Guif it would raise a political question, and should, I thought, be under the international control of the four Powers. Russia would, of course, be one of them, and might seems a direct interest in the line by arranging with the Persian Government to make a line of her own through North-West Persia to join the Bagdad Railway, by which means she would share in the international outlet on the Guiff.

I am, &c. (Signed) EDWARD GREY.

Bir A. Nicolson to Sir Edward Grey .- (Received Nacember 12.)

DURING the course of my conversation yesterday with M. Isvolsky the question the Bardad Bailway was mentioned, and I inquired of his Excellency whether he

of the Bagdad Railway was mentioned, and I inquired of his Excellency whether he had ascertained anything while at Berlin of the views of the German Government on that subject.

M. Isvolsky said that he had gathered generally, he had received no official information, that the German Syndicate had sufficient funds to enable them to construct the line over or through the Taurus, but that from that point to the terminus they would find difficulty in carrying on the undertaking without foreign assistance. He was fully alive to the necessity of the British and Russian Governments acting conjointly in the matter, and he would speak to me later on the subject when he had cleared off some of the work which had accumulated during his absence.

I said that I knew that you were willing that the line should be international, and that, therefore, Russia and Great Britain must participate in it, and I would be

happy to return to the matter on another occasion.

I have, &c. A. NICOLSON. (Signed)

No. 61.

Sir A. Nicoleon to Sir Edward Grey .- (Received November 12.)

(No. 746.)

St. Petersburgh, November 7, 1906.

Sir, I INFORMED M. Isvolsky to-day that you desired to know in what form and in what manner the Russian Government proposed to participate in the Bagdad Railway, so that we might be able to examine in what way we could associate ourselves with them. M. Isvolsky said that he had not yet studied the question fully, and he had not yet framed any definite opinion as to how the question should be approached. Was I, he asked, in a position to give him any suggestions? I told him that I had no specific proposals to make to him, but I had been reading lately some papers on the subject, and I observed that in the discussions which had taken place in 1902 between British and German financiers there seemed to be an idea of dividing the shares into equal portions with a corresponding representation, I presumed, on the Administration. Excellency asked me if I could give him a Memorandum on these proposals, simply for his own information and guidance, so that he might have some basis to go upon when discussing the matter with his colleagues in the Cabinet. I told him that I could not do so without authority, and, indeed, I did not know whether what was suggested in 1902 still held good. I would inquire of you whether I might be placed in a position to give him some information as to your views or of those of British financiers. I should be grateful if I could be furnished with a paper which I could communicate to M. Isvolsky which would be of assistance to him.

I said that I understood that the Russian Government were now ready to participate in the project, and had desisted from their former opposition to it. His Excellency said that he personally was in favour of participation, but that on the part of some of his colleagues there were still doubts and hesitations. He added that formerly there was a practice for one Ministry to take a decision which would be subsequently counteracted by the steps adopted by another Ministry, and this system, or want of system, led to endless confusion, especially in international affairs. Perhaps, he observed with a smile, my Embassy had had some experience of this want of unity among the several Ministries. Now a new departure had been taken, and any question of foreign or general policy was

discussed and decided upon by the Cabinet as a whole.

I asked him if during his visit in Paris he had ascertained what view the French Government took in regard to the Bagdad Railway. His Excellency said that M. Bourgeois had told him that he was of opinion that all the four Powers, and not only three as hitherto, should arrive at a common understanding. Russia, as I knew, had hitherto held aloof, and this had prevented France from deciding upon her course of action. He hoped now that we all should be agreed, and, so far as I could judge, he did not seem to anticipate any great difficulty in persuading his doubtful colleagues to consent to taking part in common action. I told M. Isvolsky that we wished to associate ourselves with the Russian Government, and that it would be well if discussions were not unduly prolonged. His Excellency repeated that if I could obtain for him some infor ation as to the mode of participation he would be grateful. He would treat it merely as supplied for his own guidance.

I have, &c. A. NICOLSON. (Signed)

P.S .- I had the honour to inform you of the substance of the above in my telegram No. 290 of to-day.
